Letter from the Director...

During the COVID-19 pandemic in 2020, life was in lockdown and so were domestic violence victims and their children with their abusers. During the pandemic, the experience of isolation and control experienced by women in abusive relationships was profound all over the world. Globally and in the U.S., calls to domestic violence hotlines and police arrests were up dramatically, but there was not a corresponding increase in the number of victims who received help. Due to covid-19 shelter-in place orders, victims had few options for leaving their abuser. Additionally, public transportation was shut down, and service agencies were closed or operating with limited hours and capacity. Emergency rooms especially, were overwhelmed and not accessible.

With regard to domestic violence victims, a tremendous need for help with limited means for obtaining help was true in New Mexico, as well. While there was an 8% increase in the number of crises/hotline calls in 2020, there was a 17% decrease in the number of victims who received services. Domestic violence service provider agencies operated under extreme hardship posed by COVID-19 restrictions. Offices and shelters had to be equipped and redesigned for conducting client intakes and sheltering victims while limiting their capacity to comply with strict safety protocols. Staff turnover was unprecedented from fear of contracting COVID-19, secondary trauma from seeing more severe and chronic abuse cases, and frustration with not being able to adequately serve victims as needed community resources were closed or operating on a limited basis.

The Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services has warned that pandemics in the future will be more frequent, spread more rapidly, and the cost to human life and global economies more devastating. The lesson from the COVID-19 pandemic, is that we must be better coordinated and prepared to help victims and their families, and the brave people who service them, in the future. Therefore, the time to assess and implement changes should begin now.

To those who valiantly worked tirelessly through enormous obstacles under immeasurable pressure and at the risk of their own well-being to ease the pain of victims and their families, we owe a tremendous debt. Your efforts were selfless, nothing short of heroic, and will long be remembered.

Sincerely,

Betty Caponera, Ph.D.
Director

ACKNOWLEDGEMENTS

ON BEHALF OF THE NEW MEXICO INTERPERSONAL VIOLENCE DATA CENTRAL REPOSITORY, WE WOULD LIKE TO THANK ALL THOSE WHO WENT ABOVE AND BEYOND TO ASSIST THE NEEDS OF DOMESTIC VIOLENCE SURVIVORS AND THEIR FAMILIES, WHILE FACED WITH THE DEVASTATING CHALLENGES WROUGHT BY THE COVID-19 PANDEMIC.

Program Guidance and Funding

- Department of Health, Office of Injury Prevention
- Frank Zubia, Director, State of New Mexico Crime Victims Reparation Commission
- MaryEllen Garcia, State of New Mexico Crime Victims Reparation Commission, VAWA Program Manager

Data System Analysts

- Joe Vigil, Administrative Office of the Courts, Senior Statistician
- Steve Harrington, AOC Information Technology Support Manager, Judicial Information Division
- Daniel Cannon, Iterative Consulting, Data Software Development

Report Publication

- Kim Alaburda, Cover Design, and Distribution, New Mexico Coalition of Sexual Assault Programs
- Lisa Meyer, Support Staff, Graphics and Design
- Kathleen Donlin, Support Staff

** A special thanks to the chiefs, sheriffs, marshals, and the records department staff of all the participating law enforcement agencies; executive directors and staff of the domestic violence service providers; and all data entry staff of the individual law enforcement agencies and district and magistrate courts, without whom this report would not be possible.*

SPECIAL REPORT: IMPACT OF THE COVID-19 PANDEMIC ON THE DOMESTIC VIOLENCE EXPERIENCE OF VICTIMS AND SERVICE PROVIDERS

A. Global and U.S. Reports of Domestic Violence During the COVID-19 Pandemic

During the COVID-19 pandemic, the experience of isolation and control experienced by women in abusive relationships was profoundly intense all over the world. The effects of COVID-19, as demonstrated by reports from police departments and national hotlines around the world, were devastating. Reports to police in China's Hubei province indicated that domestic violence tripled during February 2020 compared to February 2019. Likewise there were reported increases in domestic violence calls during their lockdowns in Argentina (25%), Cyprus (30%), and Singapore (33%).¹

Domestic violence calls to Refuge, a British domestic violence service, increased 25% during lockdown and hits to their website, increased by 150%.¹ In Paris, France, there was a 30% increase in police intervention for cases of domestic violence since their lockdown measures were enacted.¹ In Australia, the government reported a 75% increase in the number of Google registered searches for domestic violence assistance.²

In the U.S., in March 2020 compared to March 2019, many police departments reported an increase in domestic violence arrests: Portland (Oregon), 27%, Boston, 22%, and Seattle, 21%. Several other police departments reported an increase in domestic-violence related calls in March of 2020 compared to March of 2019. Pittsburgh, Charlotte, Oklahoma City, San Antonio and Omaha reported double-digit percent increases in domestic-violence related calls. Jefferson County Alabama reported a 27% increase in domestic violence calls.¹

It is noteworthy that victim reports during the pandemic varied throughout the country. In Chicago, domestic violence calls were up 3% in March 2020 compared to March 2019, but the Illinois Domestic Violence Hotline had the highest daily call volume in its 20 year history.³ In the same time period, St. Louis and Denver reported negligible changes in domestic violence calls to law enforcement; and San Diego and Las Vegas had small declines in domestic violence calls. Similarly, New York City had a 15% drop in domestic violence calls to law enforcement in March 2020 compared to March 2019.³

While comparison data for the month of March in 2020 and 2019 were not available in New Mexico, the Albuquerque Police Department reported a 2% increase in calls to dispatch for suspected domestic violence in calendar year 2020 (3,944) compared to 2019 (3,865), and reported a 5% increase in domestic violence cases in 2020 (8,532) compared to 2019 (8,150). (Central Repository, 2020 Domestic Violence Data).

B. How COVID-19 Exacerbated the Abuse Experience

The lockdown experience of COVID-19 was best described by Katie Ray-Jones, CEO, National Domestic Violence Hotline who reported, "We are seeing an increase in the number of survivors reaching out who are concerned with COVID-19 and how their abusive partner is

leveraging COVID-19 to further isolate, coerce, or increase fear in the relationship. Victims might find themselves stuck in close quarters with abusive partners, family members or acquaintances, making them more susceptible to abuse and lacking privacy and space to freely reach out to the outside world for help”.³

The reports made to the New York *Office to End Domestic and Gender-Based Violence* from March 18 to April 5, doubled the number of visits to the site. However, there were less people coming into the domestic violence service agencies as they were at a loss to justify to their abuser, a reason for leaving the house.³ This phenomenon was replicated in New Mexico, as there was a 9% increase in domestic violence hotline calls, but a 17% decrease in the number of survivors who sought services. (Central Repository, 2020 Domestic Violence Data).

While abusers utilize many techniques to isolate victims, the isolation during COVID-19 was unprecedented. Forced shelter-in-place orders provided easily-justified victim-isolation. To complicate the issue, survivors could not leave because access to shelters and emergency rooms was severely limited because of implemented COVID-19 safety precautions.

At the same time, as with historical times of uncertainty, gun sales increased exponentially. There were 4.3 million excess firearm purchases nationally from March through July 2020, and a total of 4,075 more firearm injuries than expected from April through July.⁴ In the U.S., 4.5 million women have been threatened with a gun by an intimate partner; and in abusive relationships, an abuser’s possession of a firearm makes it five times more likely that a domestic violence victim will be killed.⁵ It is not yet known quantifiably, how COVID-19 restrictions and stresses will impact the number of domestic violence homicides. However, on average, 600 women are killed each year from intimate partners; and 55% of all intimate-partner homicides are with a firearm.⁶

The unemployment caused by COVID-19 further exacerbated the abuse experience. A record number of Americans filed for unemployment insurance during the pandemic⁷. In January 2020, the number of unemployed persons in the U.S. was 5,796,000, by April 2020 it was four times as much (23,109,000). By December 2020, there were still 10,736,000 unemployed, which was an 83% increase over the number unemployed just one year prior, in December 2019.⁷ In January 2020 in New Mexico, the number of unemployed persons was 49,446, by April 2020 it was twice as much (90,683) and by June 2020 even higher (118,028). By December 2020, there were still 82,423 unemployed in New Mexico, which was a 71% increase over the number unemployed in December 2019.⁷ Findings from a study of intimate partner violence among U.S. adults during the early stages of the pandemic, found that people who lost their jobs due to the pandemic were three to four times more likely to perpetrate interpersonal violence compared to those who remained employed.⁸

Unemployment is strongly correlated with alcohol and drug use.⁹⁻¹¹ Alcohol use was significantly worse during the COVID-19 pandemic. In a study on alcohol consumption in response to the COVID-19 pandemic in the United States, the average drinks per day reported by respondents was 29% higher in April 2020 (after stay-at-home orders were in place) than in February 2020 (before stay at home orders were in place). Risky drinking behaviors increased

significantly: exceeding drinking limits (20%), binge drinking (21%), average drinking days (20%) and average drinks per drinking day (10%).¹²

Alcohol abuse, in turn, is strongly correlated with the severity and frequency of domestic violence.¹³ In chronic intimate partner violence, alcohol use is often found to be bidirectional. Some victims are coerced into using alcohol by an abusive partner who then sabotages their efforts toward recovery. Additionally, victims frequently use alcohol to cope with the trauma of abuse.¹³

The lockdown during the pandemic put millions of families together for prolonged periods of time causing greater stress while simultaneously limiting available outlets for stress reduction. Further, this reality, as well as conditions of unemployment and alcohol abuse during isolation, as earlier discussed, served to increase the likelihood of abuse in fragile relationships that had never before been abusive.

C. Domestic Violence Response during the COVID-19 Pandemic in New Mexico

The following information was obtained through qualitative interviews with more than a dozen domestic violence service providers in New Mexico:

During the initial shut down period of the pandemic, many New Mexico domestic violence service agencies had to shut down in order to procure and set up the technology needed for conducting remote services. Many times, this required offering relevant training to staff, as well. Additionally, agencies had to redesign the workplace (for doing intakes) and shelters to be compliant with COVID-19 safety protocols, which required admitting fewer victims at a time. As a result, service agencies had to find hotel/motel rooms for victims, which was made more difficult, as they in turn, took fewer clientele because of COVID-19 precautions. Service agencies had to seek permission to redirect targeted funding to pay for hotels, rent, meals, clothing, and needed transportation.

Referrals to other agencies was limited or impossible because of their closure or reduced hours. Even legal advocacy with statewide district courts for protection order hearings, was done remotely.

Counseling was conducted remotely where possible. Ironically, compliance was better among survivors who had the opportunity to go on-line with a counselor because they did not have to find transportation to travel or find a baby-sitter. Unfortunately, however, many survivors who needed counseling and other assistance could not get separation from their abusers to seek it.

Staff turnover during the pandemic was unprecedented. Many who were afraid of contracting COVID-19 resigned or severely limited their hours to limit their exposure to the virus. While there were fewer survivors who came to shelters, a disproportionate number of those who did, experienced severe and chronic abuse. Many counseling staff resigned from secondary trauma, as well as frustration with COVID-19 restrictions that did not allow them to adequately assist survivors in more comprehensive ways. For these reasons, even those who needed and could access on-line counseling, had to wait longer to see a counselor.

Because of severe staff reductions, agencies struggled with maintaining adequate staffing to handle their levels of demand for services. Many administrators had to get creative with staff work schedules to both, limit staff risk of exposure to the virus, while simultaneously ensuring that staff were available to attend to the needs of survivors who presented for help.

D. Steps Forward from Lessons Learned

The pandemic year of 2020 posed unprecedented challenges to people around the world, but no more so than to the victims of domestic violence and their families, and the helping professionals who stayed to aid those in crisis. The experience of helping professionals was profoundly stressful as they dealt with the most difficult challenges they have ever faced, and was eclipsed only by the experiences of victims and their children who endured unspeakable trauma.

Unfortunately, the lessons from the experiences of 2020 were learned at great cost of life and quality of life for those fortunate enough to endure. Perhaps the most important lesson is what changes need to happen to be better prepared to protect vulnerable families, and protect and properly equip those that serve them in the future. The 2020 pandemic experience has shed a bright light on a myriad of system failures that government and the private sector together must address to make a difference going forward. This of course, is of the utmost importance because a pandemic, of one type or another, is likely in our future.¹⁵

In 2019, the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) published a report on Biodiversity and Ecology that presented evidence on the likelihood of future pandemics.¹⁴ In light of the 2020 COVID-19 pandemic, the IPBES held a transdisciplinary expert panel workshop in July 2020, to undertake a rapid assessment of the scientific evidence on the origin, emergence, and impact of COVID-19, as well as potential control and prevention options. In October 2020, the (IPBES) published a report that warned of the frequency and impact of future pandemics.¹⁵ The IPBES report cautioned, “Without preventative strategies, pandemics will emerge more often, spread more rapidly, kill more people, and affect the global economy with more devastating impact than ever before.”¹⁵

The events of 2020 have taught us that it is past time to take inventory of our capabilities to serve and protect during times of mass trauma; and that the time to take strategic actions to address the range and scope of our current system failures, is now.

FACT SHEET: INTERPERSONAL VIOLENCE IN NEW MEXICO 2020

Findings from the National Intimate Partner and Sexual Violence Survey (NISVS) 2010-2012 State Report, April 2017

Lifetime Intimate Partner Violence	U.S.	New Mexico	New Mexico's Rank in the U.S.
Women	37.3%	37.6%	23rd
Men	30.9%	33.3%	16th

Annual Incidence of Intimate Partner Violence	U.S.	New Mexico
Adult Women (ages >17)	6.6%	*
Adult Men (ages >17)	6.4%	*

*No statistically reliable estimate for NM available

Lifetime Stalking	2010-2012 National Rate	2010-2012 NISVS New Mexico Rate	New Mexico's Rank in the U.S.
Women	15.8%	19.0%	6th
Men	5.3%	6.1%	9th

Annual Incidence of Stalking	U.S.	New Mexico
Adult Women (ages >17)	4.2%	*
Adult Men (ages >17)	1.9%	*

*No statistically reliable estimate available

2020 Findings from the NM Interpersonal Violence Data Central Repository

▶ Law Enforcement-Reported Rate of Domestic Violence Incidents per 1000 population	10.2
▶ Law Enforcement-Reported Rate of Domestic Violence Victimizations (Victims) per 1000 population	11.4
▶ Law Enforcement-Reported Domestic Violence Incidents, 2020	20,144
▶ Law Enforcement-Reported Domestic Violence Victims Identified, 2020	22,749
▶ Law Enforcement-Reported Domestic Violence Suspects Identified, 2020	20,559

▶ Magistrate Court New Domestic Violence Cases Filed, 2020	13,183
▶ Magistrate Court Domestic Violence Charges Disposed, 2020	14,508
▶ Magistrate Court Domestic Violence Cases Disposed, 2020	11,883
▶ Magistrate Court Domestic Violence Cases with A Conviction, 2020	622 (5%)
▶ Magistrate Court Domestic Violence Cases Dismissed, 2020	9,844 (83%)

DOMESTIC VIOLENCE IN NEW MEXICO 2020 HIGHLIGHTS

Betty Caponera, Ph.D.
December 2021

Funded by the State of New Mexico, Department of Health, Office of Injury Prevention

I. INTRODUCTION

A. THE IMPACT OF THE COVID-19 PANDEMIC ON THE DOMESTIC VIOLENCE EXPERIENCE OF VICTIMS AND SERVICE PROVIDERS

The lockdown forced by the COVID-19 pandemic resulted in mass unemployment, financial insecurity, fear and anxiety about contracting the virus, uncertainty about the future, and people in close quarters for prolonged periods of time with no ordinary outlets available for stress relief. Instead, alcohol use (exceeding drinking limits (20%), binge drinking (21%), average drinking days (20%) and average drinks per drinking day (10%) and gun sales increased dramatically (there were 4.3 million excess firearm purchases March through July 2020). All of these realities during the pandemic posed an increased risk for domestic abuse.

There were significant increases in reports to domestic violence hotlines, as well as in police arrests, all over the world: China, Argentina, Cyprus, Singapore, Britain, Australia and dozens of cities throughout the U.S. (For details see “Special Report: Impact of the COVID-19 Pandemic on the Domestic Violence Experience of Victims and Service Providers”). This was true for New Mexico, as well. The Albuquerque Police Department reported a 2% increase in calls to dispatch for suspected domestic violence in calendar year 2020 (3,944) compared to 2019 (3,865), and reported a 5% increase in domestic violence cases in 2020 (8,532) compared to 2019 (8,150).

While there were dramatic increases in crises calls and arrests, a corresponding increase in the number of victims who obtained help was not realized, due to the COVID-19 restrictions. Offenders who use an array of strategies to isolate and control their victims, welcomed the shelter-in-place orders which provided easy justification to further isolate their partners. During the COVID-19 pandemic, the experience of isolation and control experienced by women in abusive relationships was profoundly intense, and most especially among those who could not find separation from their abusers to seek professional help.

The reports made to the New York *Office to End Domestic and Gender-Based Violence* from March 18 to April 5, 2020 doubled the number of visits to their site. However, there were less people coming into the domestic violence service agencies as they were at a loss to justify to their abuser a reason for leaving the house.³ Having a valid excuse to leave, not being able to arrange travel with public transportation shut down, and finding service agencies closed or operating with limited hours and capacity resulted in less victims obtaining needed services.

This reality was replicated in New Mexico in 2020, as there was an 8% increase in domestic violence hotline calls but a 17% decrease in the number of survivors who received services.

Domestic violence service provider agencies operated under great hardship posed by COVID-19 restrictions. Offices and shelters had to be equipped and redesigned for conducting client intakes and sheltering victims while following strict safety protocols. Shelters had to limit their capacity and consequently had to find hotels/motels to accommodate victims and their children at a time when the hospitality industry was virtually closed down.

Agency administrators sought permission to redirect grant funds to pay for needed housing, meals, clothing, and transportation. Additionally, administrators had to deal with unprecedented staff turnover due to fears of contracting the virus, secondary trauma from seeing more severe and chronic abuse cases, and frustration at not being able to adequately serve victims, as needed community resources were closed or operating on a limited basis.

Many domestic violence service provider agencies in New Mexico had to procure and set up the technology needed for conducting services remotely, as well as to communicate with staff. This in many cases, required additional staff training. Most clients who needed counseling and legal advocacy for court hearings received assistance on-line. Most staff worked from home and/or had scattered working hours in the office or shelter to limit their exposure to the virus.

B. DATA SOURCES

Data sources from the Central Repository for this report include aggregate domestic violence data from statewide law enforcement and service provider agencies and individual data from district and magistrate courts provided by the Administrative Office of the Courts (AOC). The data analyzed for this report cover domestic violence data for the period 1/1/20– 12/31/20.

Additionally, findings and implications from the Adult Survivor Database (ASD) (referenced in appendix A), the Albuquerque SANE Collaborative Domestic Violence data, the National Intimate Partner and Sexual Violence Survey (NISVAS), 2010 Summary, and the 2010-2012 NISVS State Report are included to inform domestic violence prevention and system response.

II. SUMMARY OF FINDINGS 2020

Overall, there was a 12% decrease in the number of domestic violence incidents reported to law enforcement agencies in 2020 compared to 2019. However, the COVID-19 pandemic was not experienced equally among law enforcement agencies across the state.

Of the 106 law enforcement agencies reporting domestic violence data to the Central Repository, 40 reported an increase in cases. Agencies with a minimum of 10 domestic violence cases and at least a third more cases in 2020 than 2019, include: Lordsburg PD (31%); Las Vegas PD and Grant PD (35%, respectively); Santa Rosa PD (38%), Curry County Sheriff's Department (40%); and Torrance County Sheriff's Department (48%). Agencies with at least 50% or more domestic violence cases in 2020 than 2019, include: Eunice PD (50%); Chaves

County Sheriff's Office (65%); Bosque Farms PD (80%); and Isleta Tribal PD (82%). Additionally, Portales PD reported a 123% increase in domestic violence cases in 2020 than 2019.

Conversely at least 58 law enforcement agencies statewide reported a decrease in domestic violence cases: Agencies with a minimum of 10 domestic violence cases and at least a third more cases in 2020 than 2019 include: Guadalupe County Sheriff's Office and Milan PD (30%, respectively); Cibola County Sheriff's Office (31%); Taos PD and Angel Fire PD (33%, respectively); Eddy County Sheriff's Office (36%); Tucumcari PD (41%); Acoma Tribal PD (43%); Rio Arriba County Sheriff's Office (44%); Jal PD (47%); Edgewood PD (48%); and Santa Clara PD (49%). Agencies with at least 50% or more domestic violence cases in 2020 than 2019, include: Santa Fe County Sheriff's Office (54%); Bayard PD and Tor C PD (55%, respectively); Clayton PD (65%); Dona Ana County Sheriff's Office (69%) and Colfax County Sheriff's Office (75%).

There were eight law enforcement agencies that reported no change in the number of domestic violence cases in 2020 than 2019. Additionally, four agencies that reported in 2019, did not report at all in 2020, due to the lack of staffing.

Similarly, there was a 17% decrease in the number of adult victims who received domestic violence services in 2020 compared to 2019. However, while most (23) service provider agencies assisted fewer clients in 2020, five service provider agencies reported an increase in the number of victims served: Alternative to Violence (20%); Valencia Shelter (28%); Enlace Comunitario (29%); Healing House (39%); and Options, Inc. (47%).

Overall, one-third less children (32%) and one-quarter (26%) less offenders received domestic violence services in 2020 compared to 2019.

As the Central Repository analyzes calendar-year data, it is not possible to draw conclusions on the nuanced effect of "before shut-down" and "after shut-down" differences in the reported data. This in part, explains the mixed findings observed in the 2020 domestic violence data regarding the rate of injury, weapon use, alcohol use, as well as other studied variables.

While the findings on these variables are discussed in more detail in this summary, an example of the mixed findings on injury show 6% fewer cases reported by statewide law enforcement in 2020 compared to 2019. By contrast, statewide service providers' findings show a 15% increase in the number of cases with injury of adult victims, but a 4% decrease in cases with injury of children of adult victims. Further, while sexual assault of domestic violence adult victims increased 2% in 2020 from 2019, sexual abuse of the children of adult victims increased by 17%.

There was a 2% increase in weapons use in 2020 compared to 2019, as reported by statewide law enforcement agencies, and a corresponding 3% increase in cases involving weapon use as reported by service providers. However, the rate of firearm use remained constant at 5%, while national rates of firearm use increased excessively.

Law enforcement agencies reported a negligible (1%) increase in cases involving alcohol/drug use in 2020 compared to 2019. By contrast, service provider agencies reported a 4% decrease in cases involving alcohol/drug use. However, in service provider' cases where alcohol/drugs were used in 2020, victims reported a 16% increase in offender-use of alcohol and offenders reported a 5% increase in their own use.

While there was a 13% increase in the number of domestic violence cases for which the district courts issued an order of protection in 2020 compared to 2019, there was a 39% increase in the total number of protection orders issued. Most protection order hearings in 2020 were conducted remotely, on-line.

There was a 13% decrease in the number of domestic violence district court case filings in 2020 compared to 2019, and a 3% decrease in the number of domestic violence case filings in magistrate courts. There was a 20% decrease in the number of domestic violence cases disposed in 2020 compared to 2019 in district courts, and a 3% decrease in domestic violence cases disposed in magistrate courts.

The conviction rate in domestic violence district court cases remained the same (31%) in 2020 as in 2019. There was a 2% decrease in the district court dismissal rate of disposed domestic violence cases (54%) in 2020 compared to 2019.

In statewide magistrate courts in 2020, the conviction rate of disposed domestic violence cases decreased by 2% (5%) and the dismissal rate increased by 2% (83%).

A summary of specific frequencies and demographics on domestic violence, intimate partner violence, and stalking, as well as information on several characteristics of these interpersonal crimes are presented below.

A. DOMESTIC AND INTIMATE PARTNER VIOLENCE PREVALENCE

In 2020, there were 20,144 domestic violence incidents reported to statewide law enforcement agencies, a 12% decrease from that reported in 2019 (22,999).

The statewide incidence rate of *reported* domestic violence in New Mexico in 2020, is 10.2 per 1000 population, a decrease from 11.6 per 1000 in 2019. The *reported* rate of victimizations (number of victims) in 2020 was 11.4 per 1000 population.

Nearly three-quarters (71%) of domestic violence victimizations reported to statewide law enforcement agencies and half (53%) of the cases reported by statewide domestic violence service providers were perpetrated by a current or former intimate partner.

Nationally, the *National Intimate Partner and Sexual Violence Survey (NISVS) State Report* found that 37.3% of women in the U.S. experienced intimate partner violence (physical assault, sexual assault and/or stalking by a current or former spouse, boyfriend, or girlfriend). One in 4 women in the U.S. has experienced severe physical violence by an intimate partner in her lifetime, and 1 in 3 experienced being pushed, slapped or shoved by an intimate partner. Similarly, the NISVS found that 30.9% of men in the U.S. experienced intimate partner violence.

One in 7 men in the U.S. has experienced severe physical violence by an intimate partner in his lifetime, and 1 in 4 has been slapped, pushed or shoved by an intimate partner. (Smith, S.G., Chen, J., Basile, et al, [NISVS] 2017).

Nationally, in the 12-month period prior to the NISVS, 6.4% of adult men were victims of intimate partner violence; 4.5% of adult men were victims of intimate partner *physical violence*, 2.0% victims of *severe physical violence*. Similarly, the NISVS reported that 6.6% of adult women were victims of intimate partner violence; 3.6% of adult women were victims of intimate partner *physical violence*, 2.7% victims of *severe physical violence*.

The NISVS reported that the lifetime rate of intimate partner violence among women in New Mexico was 37.6%, just slightly higher (0.3%) than the national rate. Similarly, NISVS reported that the lifetime rate of intimate partner violence among men in New Mexico was 33.3%, which is higher (2.4%) than the national rate.

There are no annual incidence rates of intimate partner violence among adult men and women in New Mexico. However, given that our lifetime rates of intimate partner violence for men and women are higher than the national rates, if we conservatively apply the national 12-month rate of intimate partner violence (6.6% of adult women) to the adult women population in New Mexico, an estimated 54,892 adult women in New Mexico experienced intimate partner violence, in 2020.

Similarly, if we conservatively apply the national 12-month rate of intimate partner violence (6.4% of adult men) to the adult male population in New Mexico, an estimated 51,337 adult men in New Mexico experienced intimate partner violence, in 2020. The total estimated incidence of intimate partner violence in New Mexico is 106,229, which is 9.9 times higher than the intimate partner violence reported to law enforcement in 2020 (10,677).

B. STALKING PREVALENCE

The 231 stalking cases reported in 2020, represent a 37.5% increase over the number of stalking cases reported by law enforcement in 2019 (168). While law enforcement reported 231 stalking cases in 2020, there were 300 new stalking and aggravated stalking cases filed in district (135) and magistrate courts (165).

The lifetime stalking rates for women (15.8%) and men (5.3%) in the United States are less than the lifetime stalking rates for women (19.0%) and men (6.1%) in New Mexico. (NISVS, 2017). If we conservatively apply the national annual stalking rate for adult men (1.9% adult men) to the adult male population in New Mexico, an estimated 15,241 adult men in New Mexico experienced stalking in 2020. Similarly, if we conservatively apply the national 12-month rate of staking (4.2% of adult women) to the adult women population in New Mexico, an estimated 34,931 adult women in New Mexico experienced stalking, in 2020.

The total estimated incidence of stalking in New Mexico is 50,172, which is 217 times higher than the stalking reported to law enforcement in 2020, (231) and 167 times higher than the number of new cases of stalking/aggravated stalking filed in statewide district and magistrate courts in 2020 (300).

In 2020, there were 1,417 harassment incidents reported to law enforcement. This represents a 7% decrease in the number of harassment incidents reported in 2019 (1,528).

Similarly, there were 297 new harassment cases filed in statewide district and magistrate Courts, a 7% decrease from 2019 (320).

C. CRISES/HOTLINE CALLS TO STATEWIDE SERVICE PROVIDERS AND THE NUMBER OF VICTIMS SERVED

In 2020, 9,914 crisis calls were handled by domestic violence service providers. This represents an 8% increase over the 9,153 crisis calls handled by domestic violence service providers in 2019.

There were 6,122 adult victims served by statewide domestic violence service providers in 2020. This represent a 17% decrease from the number served in 2019 (7,415). Nationally, 26.1% of intimate partner violence victims received assistance from a victim-service agency. (Criminal Victimization, 2019).

D. VICTIM DEMOGRAPHICS

Over two-thirds (66%) of the domestic violence victims identified by law enforcement were female. Eighty-nine percent of the adult-victims served by domestic violence service providers were female.

New Mexico victims of domestic violence, as reported by law enforcement, were predominantly 19-45 years old (66%) and Hispanic (50%). Similarly, adult victims, as reported by domestic violence service providers, were predominantly 22-40 years old (57%) and Hispanic (54%).

E. SUSPECT DEMOGRAPHICS

Suspects, as reported by law enforcement, were predominantly male (72%), Hispanic (49%), and 19-45 years of age (79%). Offenders, as reported by domestic violence service providers, were predominantly male (78%), Hispanic (53%) and 22-40 years of age (68%).

Findings from the NISVS State Report revealed that in 84.8% of lifetime stalking victimizations with female victims and 43% of lifetime stalking victimizations with male victims had a male offender. The National Crime Victimization Survey (Crime Victimization, 2019), found that male victims of all violent crime victimizations, had a male offender in 75% of incidents, a female offender in 21.4% of incidents, and both a male and female offender in 3.6% of incidents. Similarly, it NCVS found that female victims of all violence victimizations had a male offender in 68.6% of incidents, a female offender in 27.7% of incidents, and both a male and female offender in 3,7% of incidents.

F. CHILDREN VICTIM-WITNESSES

Of 16,151 law enforcement reports that documented the number of incidents with children present at the scene, there were 3,908 (24%) incidents where at least one child was present.

There was a total of 6,047 children present at the scene of domestic violence incidents as reported by law enforcement, and over two-thirds (41%) of the children who witnessed these incidents were not yet adolescents (12 years and under).

There were 4,962 domestic violence service-provider reports that identified 1,168 (23%) domestic violence incidents where children were present at the scene, or at least one child witness for every four incidents. Over three-quarters (77%) of children victim-witnesses served are under age 12.

Nationally, the NCVS found children were residents in the household of an average 38% of incidents each year of intimate partner violence involving female victims and an average 21% of incidents involving male victims. (Catalano, 2007, *Intimate Partner Violence in the U.S.*)

In New Mexico, 34% of children victim-witnesses, as reported by domestic violence service providers, experienced physical abuse from the current offender of the adult victim, and 23% experienced sexual abuse from the current offender of the adult victim.

G. OFFENSE CHARACTERISTICS

1. Alcohol/Drug Use Incidence

In 2020, statewide law enforcement agencies reported that 30% of domestic violence incidents involved alcohol/drug use. This represents a 1% increase from the number reported in the 2019 (29%). Similarly, alcohol/drugs were used by 24% of victims served by domestic violence service providers. Three-quarters (77%) of offenders of the victims served by statewide service providers used alcohol/drugs at the time of the domestic violence incident.

The NCVS reported that the presence of any alcohol or drugs was reported by victims in about 42% of all nonfatal intimate partner violence. (Catalano, 2007, *Intimate Partner Violence in the U.S.*)

2. Weapon Incidence

A weapon was used in 53% of domestic violence cases reported by law enforcement and 21% of the cases reported by victims served by domestic violence service providers, in 2020. The large disparity between weapon-related assaults in domestic violence cases reported by law enforcement and victims may be explained in part, by a difference in perception between the two parties regarding what constitutes a weapon. Police officers, guided by state statute, regard the use of fists, feet, elbows, etc., as “personal weapons”. Victims may define weapons as objects other than those defined as “personal weapons” such as a bat, gun, knife, etc.

In 2019, 5% percent of all assaults involved a firearm, 8% involved a knife, and 87% involved “other” weapons. The NCVS found that 28.1% of intimate partner violence with a male victim and 15.6% of intimate partner violence victimizations with a female victim involved a non-personal weapon. A firearm was involved in 3.6% of intimate partner victimizations with a female victim and 0.5% victimizations with a male victim. A knife was involved in more (9.9%) incidents of intimate partner violence with a male victim (9.9%), than a female victim (5.6%). (Catalano, 2007, Intimate Partner Violence in the U.S.)

3. Injury Incidence

Almost half (42%) of law enforcement-reported domestic violence cases in 2020, involved injury to the victim. Similarly, in 2020, 50% of adult victims served by domestic violence service providers reported being physically injured from the domestic assault. Nationally, in 2010, the NCVS reported that 29% of all victims of violence suffered an injury; and that 41% of victims of serious violence suffered an injury. (Crime Victimization, 2011).

4. Victim/Offender Relationship

Current or former intimate partner described the victim/offender relationship of 71% of law enforcement-reported domestic violence cases and 78% of domestic violence cases reported by service providers in 2020. The NCVS reported that 64% of reported and unreported domestic violence victimizations involved an intimate partner (current or former spouse, boyfriend or girlfriend) (Criminal Victimization, 2011).

5. Interpersonal Violence Reported to Law Enforcement

In 2020, 47% of domestic violence victims who went for help reported their victimization to law enforcement. This equals the proportion of victims who reported their victimization in 2019. Nationally, 41.1% of all domestic violence victimizations were reported to law enforcement, a 11% decrease than reported in 2019 (52.2%). Similarly, nationally, 41.4% of intimate partner victimizations were reported to law enforcement in 2020, a 17% decrease than reported in 2019 (58.4%)(Criminal Victimization, 2020)).

6. Rates of Suspect Arrest

In 2020, 58% of domestic violence incidents resulted in a suspect arrest. This represents a 15% increase from the proportion of incidents with a suspect arrest in 2019 (43%).

H. DOMESTIC VIOLENCE AND THE COURTS

1. Protection Orders

In 2020, there were 16,072 protection orders issued by statewide district courts for one or more parties involved in 7,551 domestic-violence related protection order cases. Of the 16,072 protection orders issued, 1% were emergency protection orders, 73% domestic violence temporary orders of protection, and 20% judgments for permanent protection orders.

The ASD revealed that half (49%) of domestic violence survivors obtained a protection order for the most recent domestic violence incident. Of the 628 survivors involved in a prior domestic violence incident as an adult, 20% (125) obtained an order of protection. With regard to prior domestic violence events, more females (20%) than males (12%) reported obtaining a protection order.

2. New Domestic Violence Charges Filed

Overall in 2020, there were 18,570 new domestic violence charges filed in 14,787 new cases in statewide district and magistrate courts, including the Bernalillo County Metropolitan Court.

There was a total of 2,436 domestic violence charges filed in 1,604 new cases of domestic violence in New Mexico District Courts in 2020. The 1,604 new domestic violence cases filed in district courts represent a 13% decrease from the number filed in 2019 (1,851).

There was a total of 16,134 domestic violence charges filed in 13,183 new cases of domestic violence in New Mexico Magistrate Courts in 2020. The 13,183 new domestic violence cases filed in magistrate courts represent a 3% increase from the number filed in 2019 (12,776). All cases/charges are against a household member: battery, aggravated battery, and false imprisonment comprised most of the charges filed in both courts.

3. Domestic Violence Cases Disposed in District Courts

Of the 1,422 cases of domestic violence disposed in district courts in 2020, 31% (447) obtained a guilty plea/conviction, 0.35% (5) obtained an acquittal, 54% (769) were dismissed, and 14% (201) had prosecution proceedings that resulted in “other” dispositions (conditional discharges, remands, consent decrees, and deferred cases).

4. Domestic Violence Cases Disposed in Magistrate Courts

Of the 11,883 cases of domestic violence disposed in magistrate courts in 2020, 5% (622) obtained a guilty plea/conviction, 0.36% (43) obtained an acquittal, 83% (9,844) were dismissed, and 12% (1,373) had prosecution proceedings that resulted in “other” dispositions (bind over cases, transfers, deferred cases, and conditional discharges).

III. IMPLICATIONS OF THE FINDINGS

A. COVID-19 PANDEMIC IMPLICATIONS FOR CHANGE

In 2019, the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) published a report on Biodiversity and Ecology that warned of future pandemics. In light of the 2020 Covid-19 pandemic, the IPBES held a transdisciplinary expert panel workshop in July 2020, to undertake a rapid assessment of the scientific evidence on the origin, emergence, and impact of COVID-19, as well as potential control and prevention options. In October 2020, the (IPBES) published a report that warned of the frequency and impact of future pandemics. The IPBES report cautioned that, “Without preventative strategies, pandemics will emerge more often,

spread more rapidly, kill more people, and affect the global economy with more devastating impact than ever before.” (IPBES, 2020).

The events of 2020 have taught us that it is past time to take inventory of our capabilities to serve and protect during times of mass trauma. Government and the private sector must work together to take strategic action to address the range and scope of system failures during the COVID-19 pandemic that resulted in devastating human and economic costs. The IPBES stated that “it is clear that current reactive strategies which center on rapid containment and control following disease emergence are insufficient to fight future pandemics.” (IPBES, 2020)

To this end, recommendations from IPBES include evidence-based policy options that include five broad categories aimed at fundamentally transforming our relationship with nature: establishing enabling mechanisms (which includes a high-level intergovernmental council on pandemic prevention); developing policies to address the role of land-use change; developing policies related to wildlife trade; closing critical knowledge gaps; and fostering society-wide engagement in pandemic risk reduction

Perhaps nowhere is the need to ensure that appropriate policies and systems are in place, communities well equipped and prepared, and response effectively coordinated during catastrophic events, than among those systems and professionals whose purpose it is to prevent domestic violence and further, effectively assist those who have been abused.

Lessons from the pandemic have shown that there is no aspect of domestic violence response that does not need to be analyzed and evaluated for determining the changes that are needed to ensure that during catastrophic events: 1) at risk families are identified, know a way to seek help, and can access help; 2) helping agencies are adequately staffed with trained personnel, equipped, coordinated with each other, and funded to continue operations; and 3) staff is safe, with needed protections for themselves and their families that enable them to effectively continue to perform their work.

**INCIDENCE AND NATURE OF DOMESTIC VIOLENCE IN NEW MEXICO XIX:
An Analysis of 2020 Data from
The New Mexico Interpersonal Violence Data Central Repository**

Developed by Betty Caponera, Ph.D.

New Mexico Coalition of Sexual Assault Programs

December 2021

INCIDENCE AND NATURE OF DOMESTIC VIOLENCE IN NEW MEXICO, 2020

I. INTRODUCTION

The National Intimate Partner and Sexual Violence Survey (NISVS) funded by the National Center for Injury Prevention and Control of the Centers for Disease Control and Prevention, is an on-going survey of sexual violence, stalking, and intimate partner violence among adult women and men in the United States. Fortunately, data collected from 2010-2012 were analyzed to determine estimated lifetime rates of specific interpersonal violence victimizations for all 50 states and the District of Columbia and published in the NISVS 2010-2012 State Report. While annual incidence rates are not available for most states, this report is invaluable to provide lifetime estimates of these reported and unreported interpersonal violence crimes that could otherwise not be obtained unless each state had the funds to conduct its own victimization survey.

Current estimates of each of the specified interpersonal violence crimes presented on the FACT SHEET of this report are based on the NISVS 2010-2012 State Report, hereafter referred to as the NISVS State Report.

The NISVS State Report found significant differences in the prevalence of lifetime interpersonal violence among survivors of different racial/ethnic groups. In 2017, findings from an examination of six years of individualized domestic violence data from the Albuquerque Sane Collaborative were published in a special supplement of the *Incidence and Nature of Domestic Violence in NM, XVI* report, 2017. This special supplement, *An Examination of Domestic Violence by Survivor Race/Ethnicity in Bernalillo County*, can be found on-line at nmcswp.org.

From 2010 to 2012, the Adult Survivor Database (ASD) was developed in collaboration with the New Mexico Coalition Against Domestic Violence to capture research information on individual domestic violence survivors who seek assistance from statewide domestic violence service providers. The individual data made possible the study of existing relationships between factors that influence risk and outcomes of domestic violence victimization. Findings from the ASD were first published in the 2013 *Incidence and Nature of Domestic Violence XII*, report. To review these findings see **Appendix A: Life Experiences of Adult Survivors of Domestic Violence**.

This report presents an analysis of aggregate law enforcement and service provider domestic violence data from calendar year 2020, individual data from the Administration Office of the Courts, which were all submitted to the New Mexico Interpersonal Violence Data Central Repository, and implications of the findings.

Finally, an analysis of 15 important domestic violence variables for each individual county is presented, so that the reader can access important domestic violence trends in his/her county at a glance.

II. DEFINITIONS

Domestic violence incidence, as determined by law enforcement, include all incidents of assault, aggravated assault, battery, aggravated battery, and criminal damage to property as outlined in the “Crimes Against Household Members Act” in statutes 30-3-10 through 3-3-18. Full definitions are found in **Appendix B**.

Data submitted from law enforcement agencies are used to determine statewide domestic-violence reported incidence and the county rates of reported domestic violence.

Domestic violence cases, as determined by domestic violence service providers, include all adult victims who are accepted as clients by the providers for delivery of services. Data on children victim-witnesses and offenders served by domestic violence service providers are also analyzed and presented herein. None of the cases served by the domestic violence service providers are considered in the county reported rates of incidence to avoid possible duplication of reporting.

Domestic violence data from all magistrate and district courts include codes that capture aggravated assault, aggravated battery, aggravated stalking, assault, battery, stalking, assault with intent to commit a violent felony, criminal damage to property, deprivation of property, false imprisonment, violation of a protective order, and harassment - all against a household member. These codes are extracted from the Administrative Office of the Courts Judicial Information System.

Currently, standardized data from each aforementioned discipline are submitted to the Central Repository on a quarterly basis. The data from the Central Repository analyzed for this report covers domestic violence data for the period 1/1/20 – 12/31/20.

III. LAW ENFORCEMENT AND SERVICE PROVIDER DATA FINDINGS

A. Domestic Violence Incidents in 2020 Identified by Law Enforcement

There were 106 law enforcement agencies that submitted domestic violence data to the Central Repository during 2020 (see **Appendix C**). Data from each participating agency was extracted from police offense incident reports and submitted in aggregate form on the standardized *Law Enforcement Domestic Violence Data Collection Form* (see **Appendix D**).

The total number of reports for each variable analyzed from law enforcement vary, as all questions may not be answered on each report submitted. The number of reports considered for each question analyzed is stated throughout the report as the findings on each variable are discussed. There were 20,144 domestic violence incidents reported to statewide law enforcement agencies in 2020. This represents a 12% decrease from that reported in 2019 (22,999). Domestic violence reports to law enforcement agencies varied across the U.S. during the COVID-19 pandemic (refer to the *Special Report: Impact of the COVID-19 Pandemic on the Domestic Violence Experience of Victims and Service Providers*) and in New Mexico, as well. In New Mexico, three law enforcement agencies completely closed due to COVID-19 staffing problems. Many others experienced limited staffing, resulting in limited operations.

- ▶ Incidents Reported by Law Enforcement Agency
- ▶ Law Enforcement-Reported Incidents by Agency and County

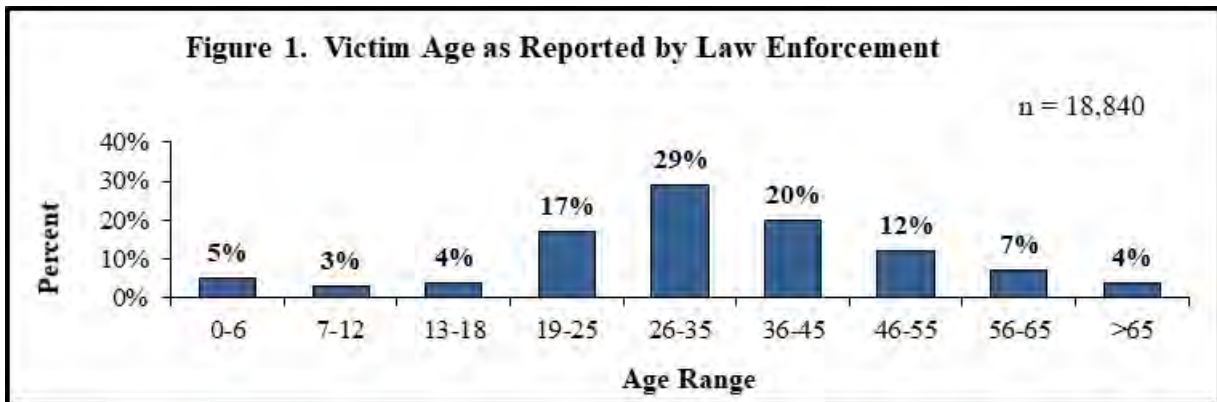

Appendix G
Appendix H
Appendix I
Section 3A
Table 1
Table 2

B. Domestic Violence Victims Identified by Law Enforcement: Number, Gender, and Age

There were 22,749 victims involved in the 20,144 domestic violence incidents reported to statewide law enforcement agencies in 2020. Victim gender was identified in 19,482 cases.

- ▶ Number of Adult Victims Identified by Law Enforcement 22,749
- ▶ Number Gender Known 19,482
- ▶ Number Male Victims 6,043 (31%)
- ▶ Number Female Victims 13,439 (69%)
- ▶ Number and Gender of Victims by Law Enforcement Agency **Table 3**

Of the 18,840 reports that identified *victim age*, the greatest proportion of all victims was in the age group 26-35 (29%), followed by 36-45 (20%), and 19-25 (17%). See **Figure 1**.

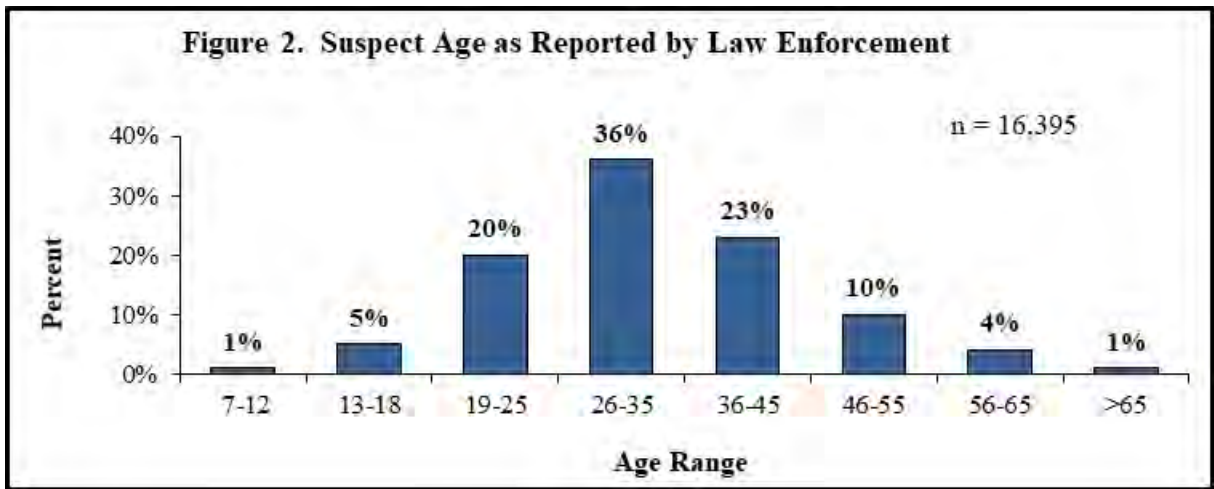

C. Domestic Violence Suspects Identified by Law Enforcement: Number, Gender, and Age

There were 20,559 suspects involved in the 20,144 domestic violence incidents. Suspect gender was documented in 16,703 cases.

- ▶ Number of Suspects Identified by Law Enforcement 20,559
- ▶ Number of Suspects Gender Known 16,703
- ▶ Number Male Suspects 12,082 (72%)
- ▶ Number Female Suspects 4,621 (28%)
- ▶ Number and Gender of Suspects by Law Enforcement Agency **Table 4**

Of 16,395 reports that identified *suspect age*, the age group with the greatest proportion of reported suspects was 26-35 (36%), followed by 36-45 (23%), and 19-25 (20%). See **Figure 2**.

D. Race/Ethnicity of Victims and Suspects Identified by Law Enforcement

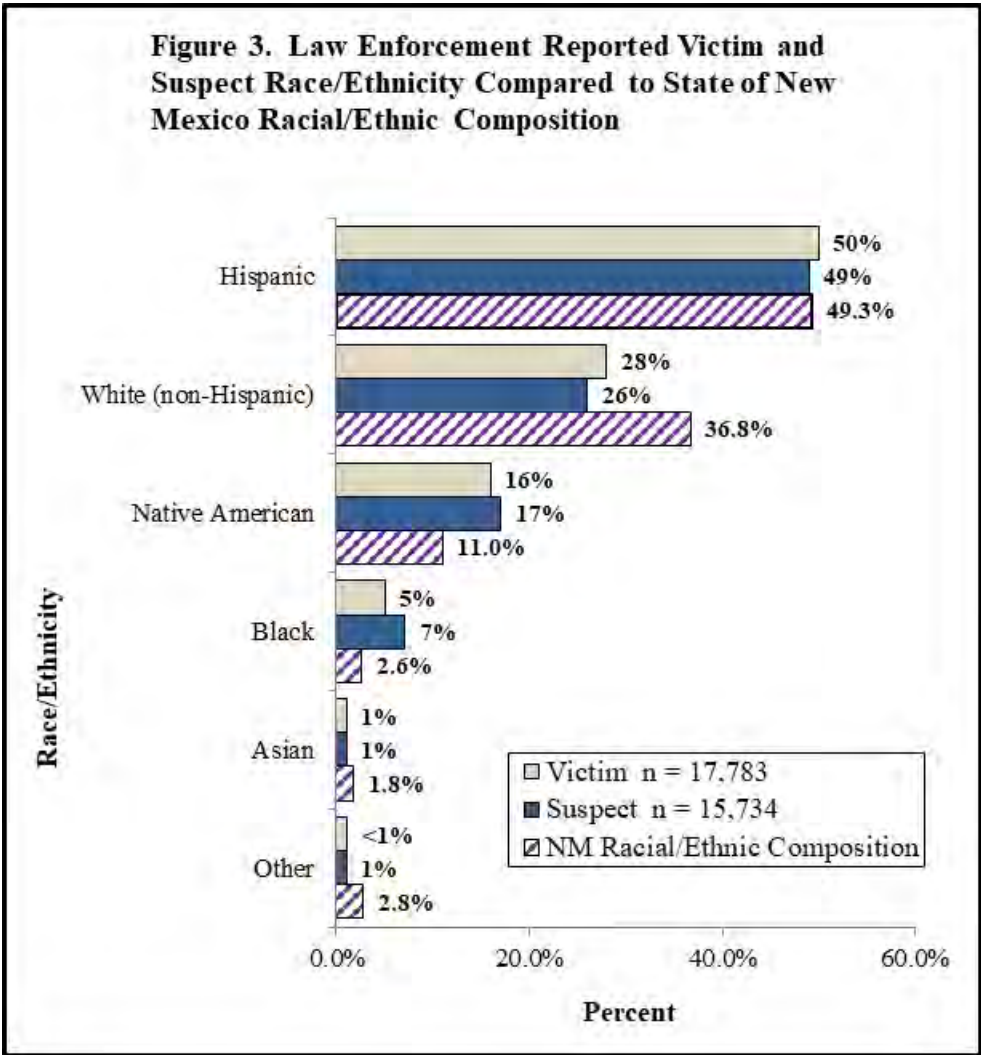

- ▶ Number of Law Enforcement Victims Race/Ethnicity Identified 17,783
- ▶ Number of Law Enforcement Suspects Race/Ethnicity Identified 15,734

Of 17,783 domestic violence victims, 50% were Hispanic, 28% White (non-Hispanic), 16% Native American, 5% Black, 1% Asian, and <1% victims of “other” races. Likewise, of the 15,734 reports that identified suspect race/ethnicity, 49% were Hispanic, 26% White (non-Hispanic), 17% Native American, 7% Black, and 1% respectively, Asian and suspects of “other” races. For a comparison of victim and suspect race/ethnicity to racial/ethnic compositions in New Mexico, see **Figure 3**.

E. Stalking and Harassment Incidents Identified by Law Enforcement

There were 16,185 law enforcement reports that documented the number of stalking cases that came to the attention of law enforcement in 2020. Of these, 231 (1%) stalking cases were identified. Similarly, there were 16,591 reports that documented the number of harassment cases that came to the attention of law enforcement. Of these, 1,417 (8.5%) harassment cases were identified.

- ▶ Number of Law Enforcement-Identified Domestic Violence Incidents 20,144
- ▶ Number of Law Enforcement Reports Documenting Stalking Status 16,185
- ▶ Number of Stalking Incidents Identified by Law Enforcement 231 (1%)
- ▶ Number of Stalking Cases Reported by Law Enforcement Agency **Table 5**
- ▶ Number of Law Enforcement Reports Documenting Harassment Status 16,591
- ▶ Number of Harassment Incidents Identified by Law Enforcement 1,417 (8.5%)
- ▶ Number of Harassment Cases Reported by Law Enforcement Agency **Table 6**
- ▶ Number of Harassment and Stalking Cases Reported, by County **Table 7**

F. Domestic Violence Victims Served by Domestic Violence Service Providers

There were 28 domestic violence service providers that submitted data to the Central Repository for 2020 (see **Appendix J**). Aggregate data from each participating agency was extracted from client intake information and submitted on the standardized *Domestic Violence Service Agencies Data Collection Form* (see **Appendix K**).

The total number of reports for each variable analyzed from service providers vary as all questions may not be answered on each report submitted. The number of reports considered for each question analyzed is stated throughout the report as the findings on each variable are discussed.

1. Number Seeking Services

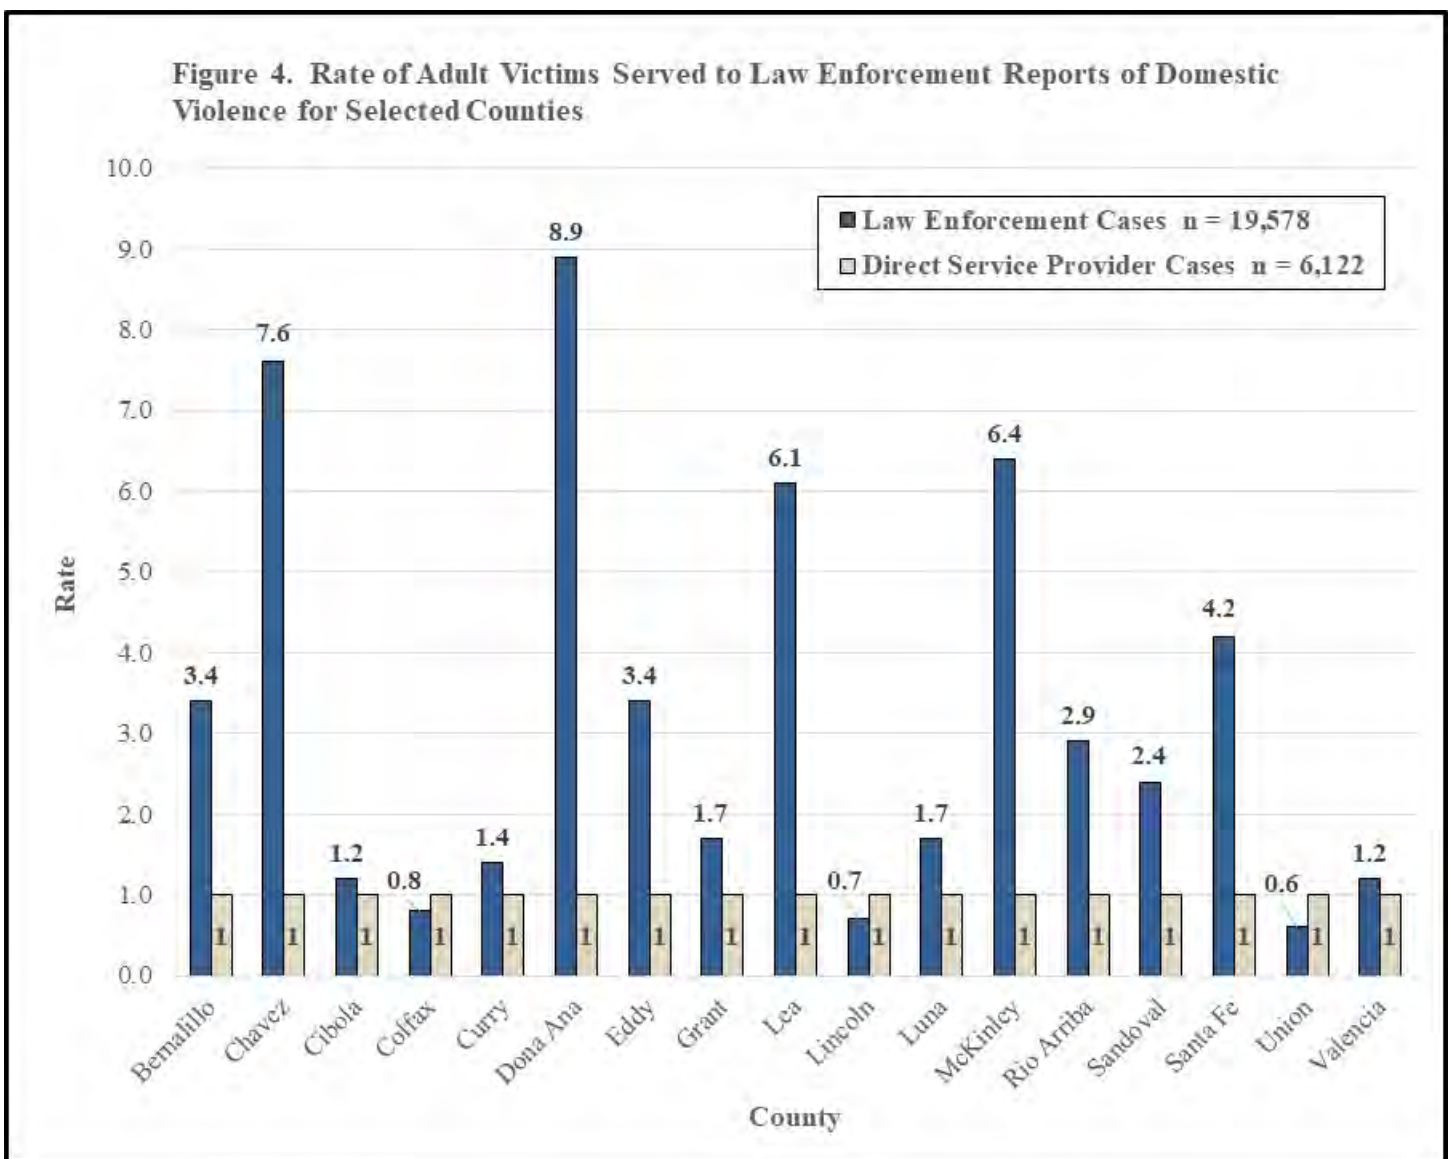

There were 8,677 new clients served during 2020, which is a 21.5% decrease in the number of total clients served in 2019 (11,061). Reasons for the significant decrease in the number of clients served are outlined in the *Special Report: Impact of the COVID-19 Pandemic on the Domestic Violence Experience of Victims and Service Providers*.

- ▶ Number of Adult Victims, Children, and Offenders Served for All Counties
- ▶ Number of Adult Victims Served by Agency

Table 8
Table 9

▶ Five-Year Trends of All Served for Each County	Section 3B
▶ Total Number of Adult Victims Served by Service Providers	6,122
▶ Total Number of Children Victim/Witnesses Served by Service Providers	1,667
▶ Total Number of Offenders Treated by Service Providers	888
▶ Number of Offenders Treated by Agency	Table 10

An analysis was conducted comparing the number of adult victims served to the number of domestic violence incidents reported by law enforcement (in counties with the law enforcement agency from the largest city reporting, *and* where the direct service provider reported in all four quarters of 2020). This analysis revealed that *Dona Ana County* had the fewest number of victims receiving services relative to the number of incidents reported to police (1 out of 8.9), followed by *Chaves County* (1 out of 7.6), *McKinley County* (1 out of 6.4), and *Lea County* (1 out of 6.1). See **Figure 4** for the rate of all qualifying counties.

In 2020, the number of adult victims who went to service providers for help (6,122) represent 30% of domestic violence victims identified by law enforcement (20,144). This is slightly fewer than the 32% of law enforcement incidents represented by adult victims served in 2019.

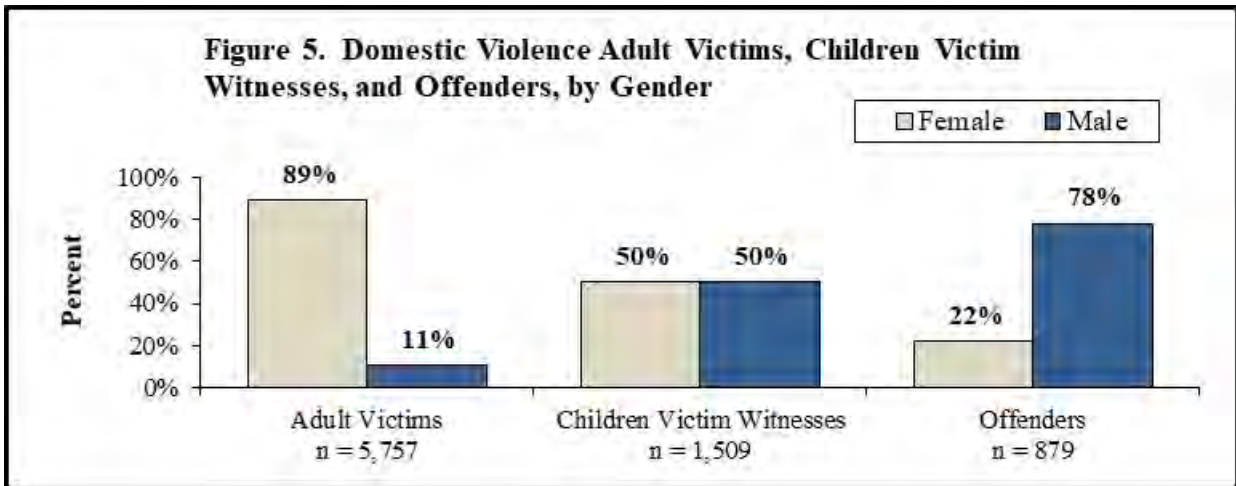

Offenders who went for treatment (888) represent 4% of the domestic violence suspects identified by law enforcement (20,559). This is a 0.8% decrease from those represented in 2020.

2. Gender of Those Served

Survivor gender was documented in 5,757 adult victims served. Eighty-nine percent (5,128) of the adult victims served were female. Conversely, 78% (686) of the 879 reports that documented offender gender, reported the offender was male. Gender was documented 1,509 of the children victim-witnesses served. Fifty-percent respectively, were female (751) and male (758) children. See **Figure 5**.

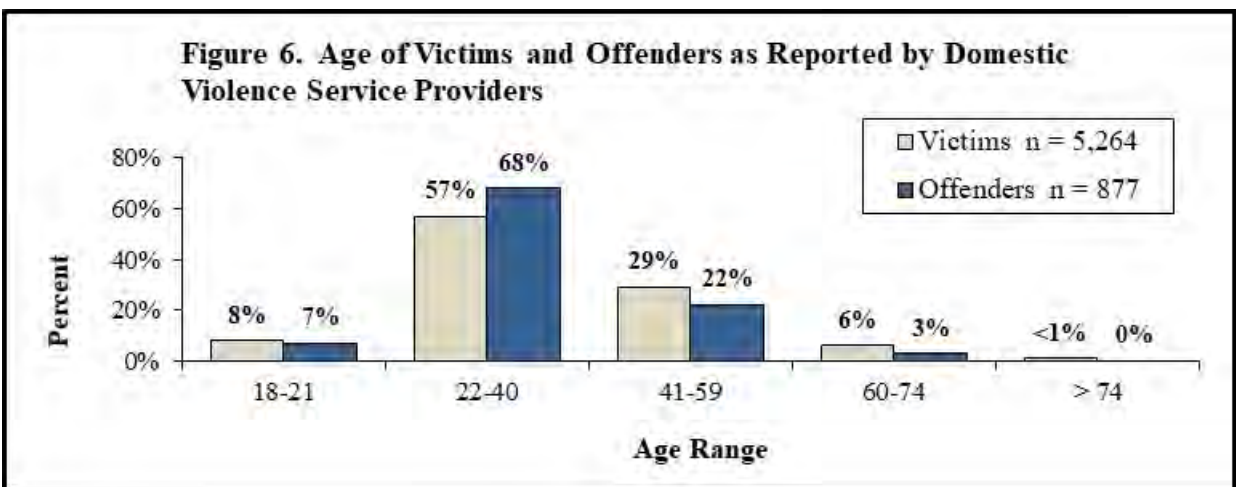

- ▶ Number of Victims Served by Each Service Provider Agency, by Gender
- ▶ Number of Offenders Served by Service Provider Agency, by Gender

Table 11
Table 12

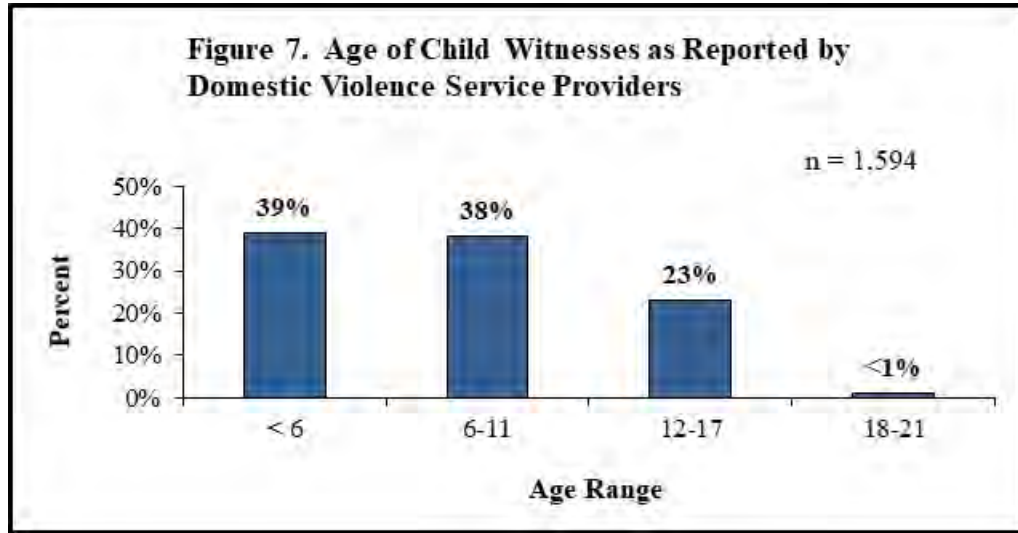

3. Ages of Those Served

The age of the adult victim was documented in 5,264 provider reports. Among adult victims, 57% (2991) were predominately ages 22-40, 29% (1,517) were ages 41-59, and 8% (426) were ages 18-21. Victims ages 60-74 comprised 6% (307) of all adult victims served, and victims ages >74 comprised <1% (23). See **Figure 6**.

Of the 877 reports that documented offender age, 68% (599) were ages 22-40, 22% (191) ages 41-59, 7% (65), ages 18-21, 3% (22), ages 60-74, and 0% ages >74. Refer to Figure 6.

The age of children victim-witnesses was documented in 1,594 of the children served. Thirty-nine percent (617) of the children victim-witnesses were ages <6, 38% (612), ages 6-11, 23% (362), ages 12-17, and <1% (3), ages 18-21 years old. See **Figure 7**.

4. Race/Ethnicity of Those Served

The race/ethnicity of the adult victim was identified in 5,798 reports. Of these, 54% (3,113) were Hispanic, 27% (1,545) White (non-Hispanic), 10% (572) Native American, 5% (267) “other”, 4% (251) Black, and 1% (50) Asian. For a comparison of adult victims’ racial/ethnic distribution to the racial/ethnic composition of New Mexico, see **Figure 8**.

Hispanics comprised 55% (831) of the 1,512 children victim-witnesses where race/ethnicity was documented, followed by Native Americans, 17% (251), Whites (non-Hispanics), 20% (296), Blacks, 4% (60), “other” races, 4% (67) and Asians, <1% (7). Refer to Figure 8.

Of the 872 offender reports that documented offender race/ethnicity, the racial/ethnic group with the greatest number of offenders represented were Hispanics, 53% (462), followed by Whites (non-Hispanics), 25% (221), Native Americans, 14% (120), Blacks, 4% (33), “other” race/ethnicity, 4% (31), and Asians, 1 (5). Refer to Figure 8.

G. Domestic Violence Incidents That Involve Alcohol and/or Drug Use

- ▶ Law Enforcement Reports Documenting Alcohol/Drug Use Status 16,677
- ▶ Number Law Enforcement Incidents Involving Alcohol/Drug Use 4,988 (30%)
- ▶ Number of Law Enforcement-Reported Domestic Violence Incidents Involving Alcohol/Drug Use for All Counties **Table 13**
- ▶ Five-Year Trends in Domestic Violence Cases Involving Alcohol/Drug Use for Each County **Section 3D**

Figure 8. Ethnicity/Race of Victim, Offender, and Child Witnesses (as Reported by Domestic Violence Service Providers) Compared to State of New Mexico Ethnic/Racial Composition

H. Alcohol and/or Drug Use Among Victims Who Sought Help

- ▶ Number of Service-Provider Victim Reports Documenting Alcohol/Drug Status 2,954
- ▶ Number of Adult Victims Served Who Reported Using Alcohol/Drugs At The Time of The Domestic Violence Incident 708 (24%)

One-quarter (24%) of service provider cases reported victim-use of alcohol/drugs at the time of their domestic violence incident. Service providers reported that three quarters (77%) of adult victim domestic violence cases involved an offender who was using alcohol/drugs. See **Figure 9**.

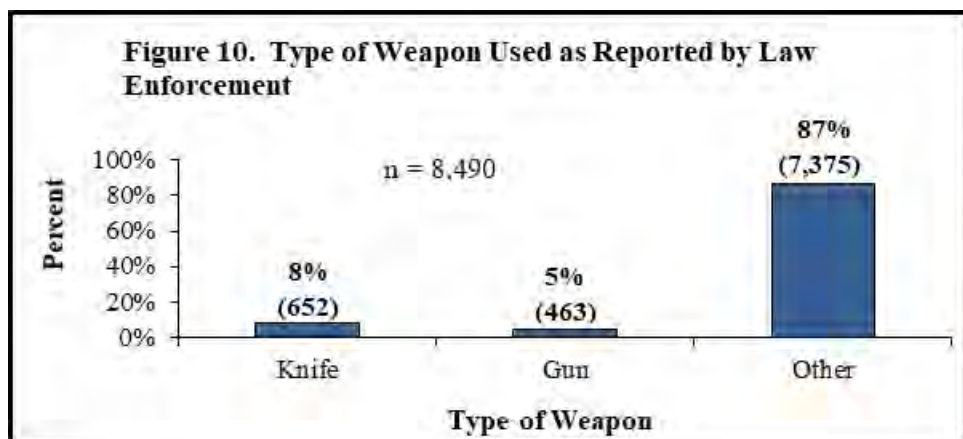

- ▶ Number of Adult Victims Served Who Reported Whether Their Offender Was Using Alcohol/Drugs At The Time of The Domestic Violence Incident 2,969
- ▶ Number of These Reporting Offender Use of Alcohol/Drugs (Refer to Figure 9) 2,289 (77%)
- ▶ Number of Service-Provider Offender Reports Documenting Alcohol/Drug Status 535
- ▶ Number of Offenders Served Who Reported Using Alcohol/Drugs At The Time of The Domestic Violence Incident 298 (56%)

I. Domestic Violence Incidents That Involve A Weapon

- ▶ Number of Law Enforcement Reports Documenting Weapon-Use Status 16,354
- ▶ Number of Law Enforcement-Reported Incidents Involving A Weapon 8,744 (53%)
- ▶ Number of Law Enforcement-Reported Incidents Involving A Weapon by Agency **Table 14**
- ▶ Number of Law Enforcement-Reported Domestic Violence Incidents Involving A Weapon for All Counties **Table 15**
- ▶ Five-Year Trends in Domestic Violence Cases Involving Weapon Use for Each County **Section 3D**

There were 8,490 weapons identified in the 8,744 domestic violence incidents where a weapon was used. A knife was used in 8% (652) of the incidents involving weapons. A firearm was used in 5% (463) of the incidents involving weapons. “Other” weapons including, “personal” weapons (fist, feet, etc.) and “non-personal” weapons (boards, lamps, etc.) were used in 87% (7,375) of the incidents involving weapons. See **Figure 10**.

J. Weapon Use Among Those Who Sought Help

- ▶ Number of Service Provider Cases Documenting Weapon-Use Status 4,966
- ▶ Number of Service Provider Cases Involving A Weapon 1,042 (21%)
- ▶ Number of Service Provider Cases Involving A Weapon, by Agency **Table 16**

K. Domestic Violence Incidents That Involve Injury to Adult Victims

- ▶ Number of Law Enforcement Incidents Documenting Injury Status 16,835
- ▶ Number of Law Enforcement Incidents Involving Injury 7,056 (42%)
- ▶ Percent Law Enforcement-Reported Incidents Involving Injury, by County **Table 17**
- ▶ Five-Year Trends in Domestic Violence Cases Involving Victim Injury for Each County **Section 3E**

There were 7,394 injuries documented in the 7,056 cases involving injury. Of these, 82% (6,052) were minor injuries, 9% (632) major injuries, 5% (364) severe lacerations, 3% (192) loss of consciousness, 1% respectively, broken bones (75) and internal injuries (65), and <1% (14) loss of teeth. See **Figure 11**.

L. Domestic Violence Incidents That Have Children Present At The Scene

- ▶ Number of Service Provider Reports That Documented Whether Children Were Present 4,962
- ▶ Number of Service Provider Domestic Violence Cases with Children Present 1,168 (23%)
- ▶ Number of Law Enforcement Domestic Violence Reports Documenting Status Of Children Present 16,151
- ▶ Number of Law Enforcement Domestic Violence Incidents with Children Present 3,908 (24%)
- ▶ Total Number of Children Present at the Scene of Domestic Violence Incidents 6,047

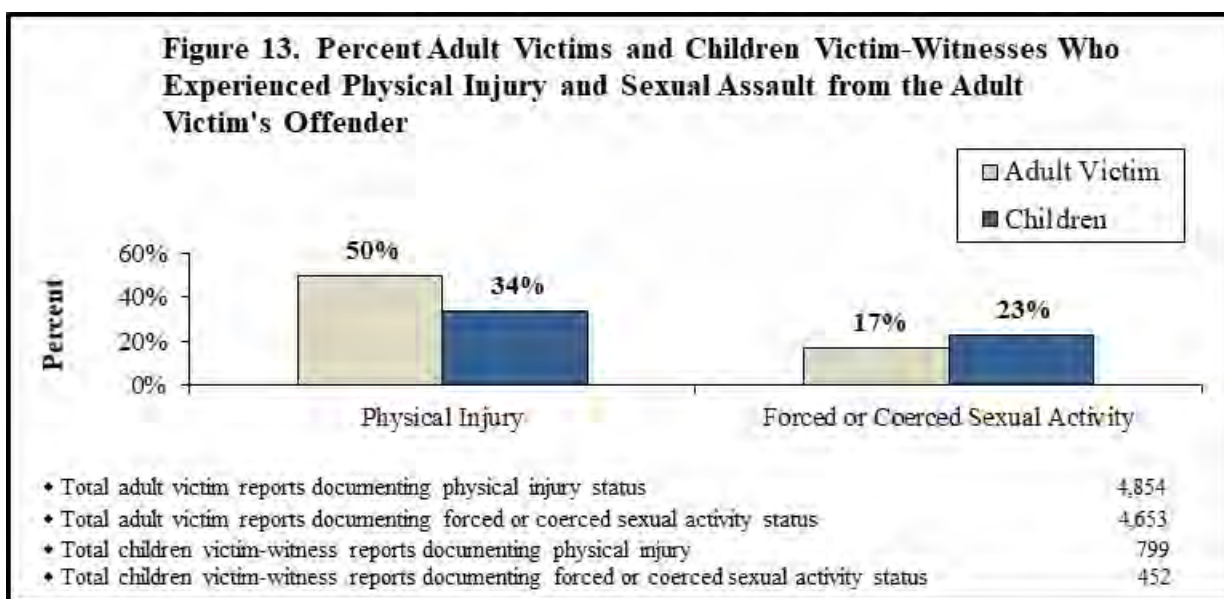

As reported by law enforcement, the ages of the children witnesses were documented in 5,511 cases. One-third (33%) of these children were ages 18-21, 26% ages 13-17, 25% under 6 years of age, 11% ages 6-9 and 5% ages 10-12. Therefore, 41% of the children who witnessed domestic violence incidents were not yet adolescents. See **Figure 12**.

There were 16,051 law enforcement-reported domestic violence incidents that documented both the number of incidents with children present and the number of children present. Of these incidents, 3,873 had children present and the total number of children present was 5,998 or 1.5 children per incident.

M. Injury and Sexual Assault Among Adult Victims and Children Who Sought Help

Of 4,854 service provider reports, 2,435 (50%) adult victims reported being physically injured from the domestic assault. Similarly, there were 4,653 provider reports that identified 807 (17%) adult victims who experienced forced or coerced sexual activity from the current offender. See **Figure 13**.

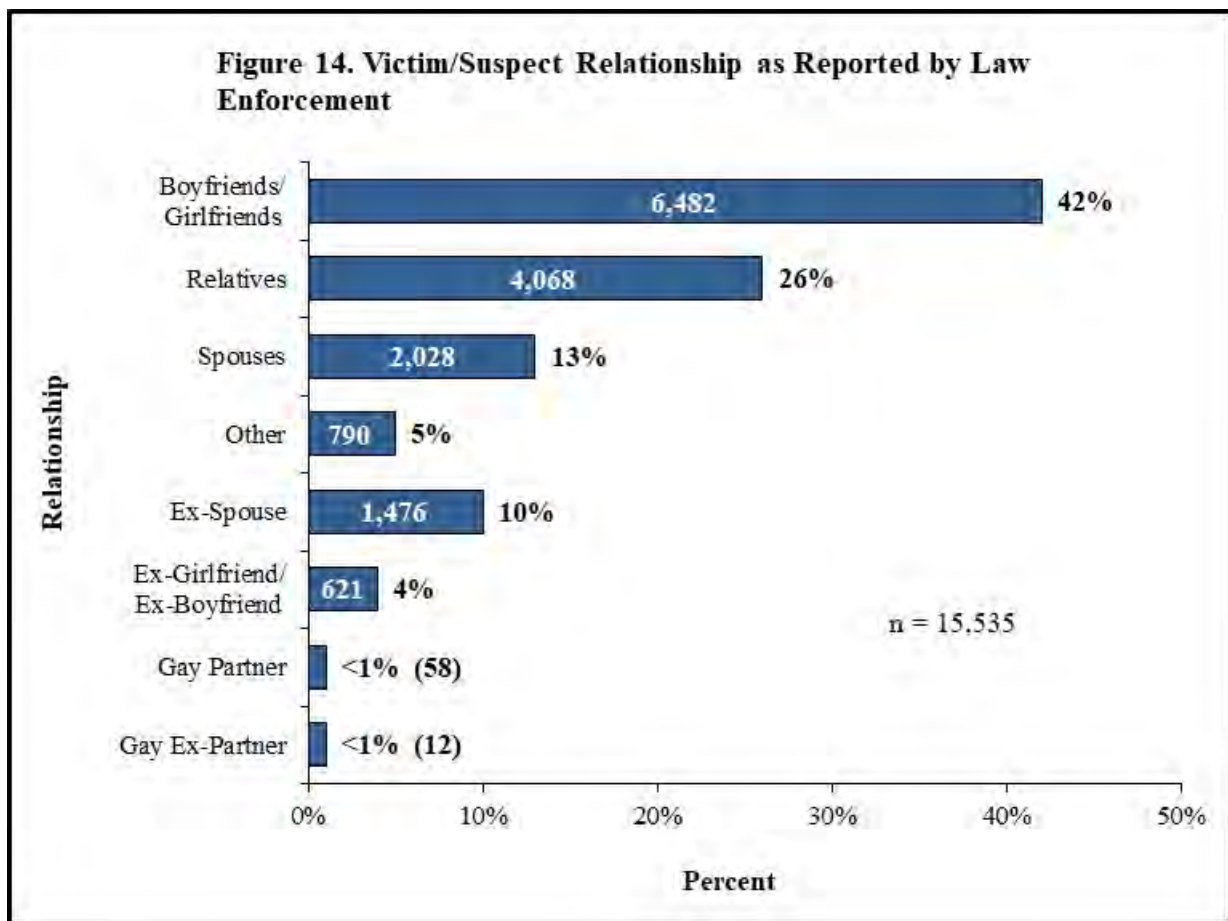

There were 799 service provider reports that identified 270 (34%) children victim-witnesses that experienced physical abuse from the current offender of the adult victim. Similarly, there were 452 provider reports that identified 102 (23%) children victim-witnesses who experienced sexual abuse from the current offender of the adult victim. Refer to Figure 13.

N. Victim/Suspect Relationship

Of 20,559 suspects reported by law enforcement, their relationship to the victim was documented among 15,535. Of these, a total of 42% were *boyfriend/girlfriend* and 4%, *ex-boyfriend/ex-girlfriend*. *Relatives* accounted for 26% of identified victim/suspect relationships. The victim/suspect relationship in 13% was a *spouse* and (10%) an *ex-spouse*, <1%, respectively were *gay partner* and *gay ex-partner*. See **Figure 14**.

The victim/offender relationship was documented in 4,825 service provider reports. Over half (53%) of offenders were intimate partners of their victims with the following relationship descriptions: married (23%), living together (13%) or dating (17%). One-third (33%) of offenders were ex-intimate partners of their victims, with the following relationship descriptions: separated (5%), divorced (3%), or ex-partner (25%). Another 8% of offenders were a family member of the victim, and 5% other known, non-family members of the victim. See **Figure 15**.

O. Length of Victim/Offender Relationships

There were 4,225 reports that documented the length of relationship between the victim and offender. Most victims reported a relationship duration of 3-5 years (22%), followed by those in relationship for 6-10 (20%), 1-2 years (19%), 11-20 years, (15%), <1 year and over 20 years (12%, respectively). See **Figure 16**.

Figure 15. Type of Survivor/Offender Relationship, as Reported by Service Providers

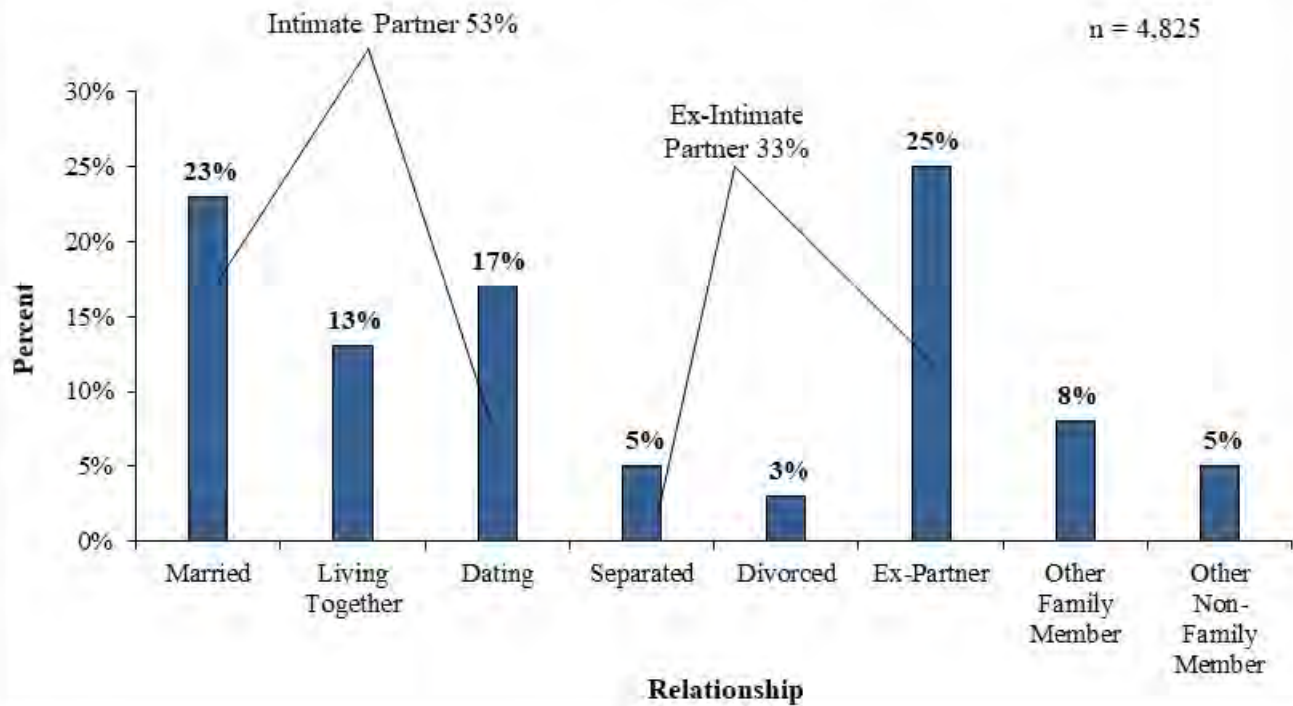

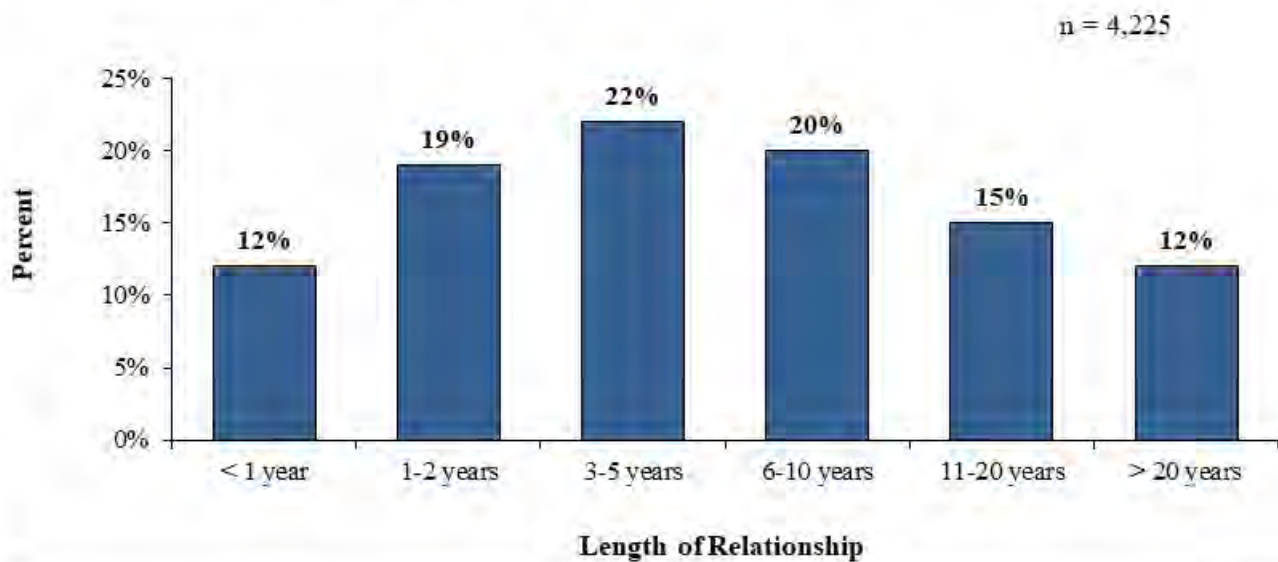

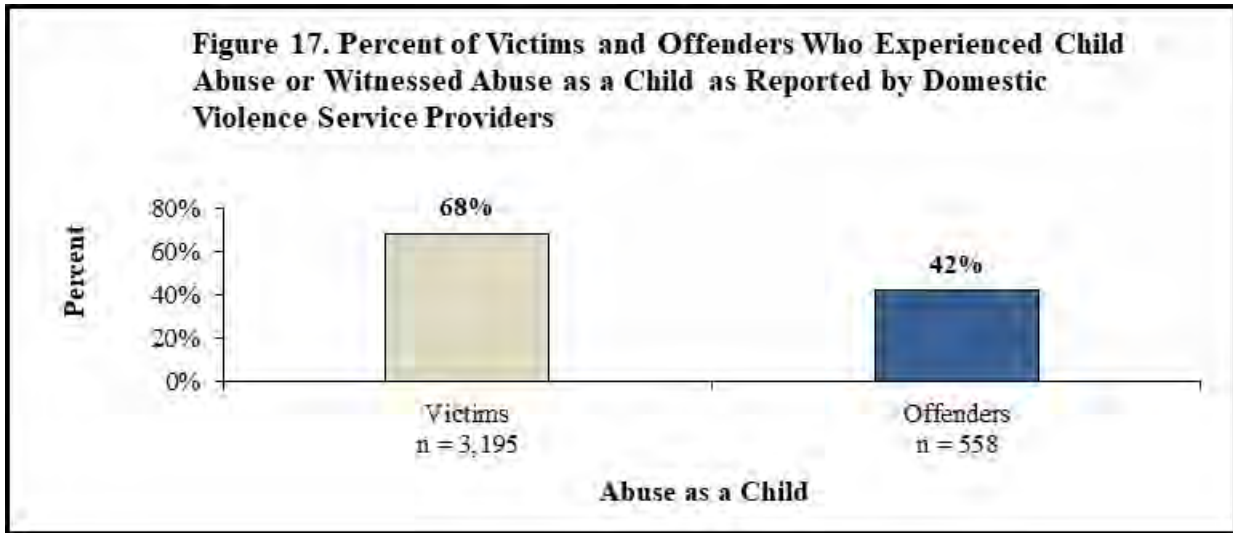

Figure 16. Length of Victim/Offender Relationship as Reported by Domestic Violence Service Providers

P. Victims and Offenders Abused As Children

In 2020, there were 558 offender reports that documented past abuse. Of these, 42% (237) of offenders reported experiencing abuse as a child. See **Figure 17**.

Past victim abuse and/or the witnessing of abuse as a child was documented in 3,195 adult victim provider reports. Over two-thirds (68% or 2,158) of adult victims reported experiencing abuse as a child. Refer to Figure 17. Additionally, 58% or 2,654 of 4,600 adult victims reported experiencing at least one prior domestic violence incident as an adult.

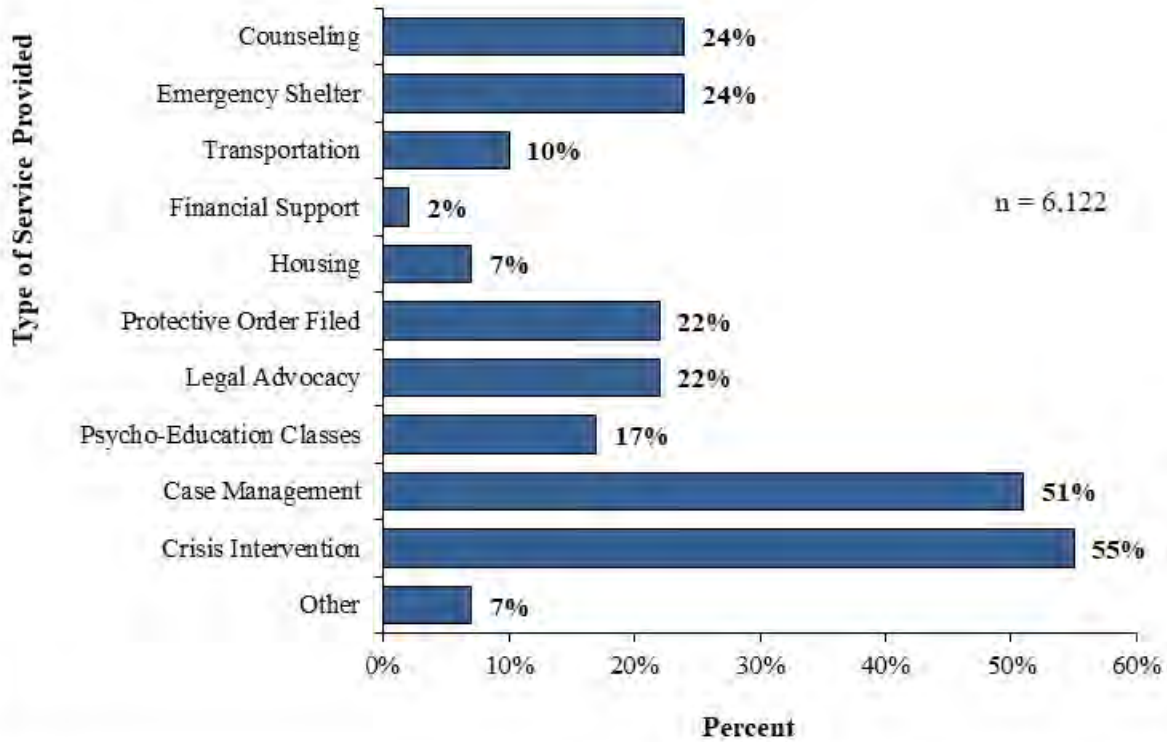

Q. Sources of Adult Victims’ Referrals for Help and The Services They Receive

Of 4,857 referrals documented, most adult victims were self-referred and referred by law enforcement to service providers (26%, respectively), followed by a client (7%), the victim’s friends and a family relative (6%, respectively). Nearly one-quarter were referred by unspecified “other” sources **Table 18**. Additionally, service providers throughout the state responded to 9,914 crisis/hotline calls, an 8% increase from the number fielded in 2019 (9,153). The *Domestic Violence Resource Center* (Albuquerque) responded to the most crisis calls, 31% (3,089), followed by *SAFE House* (Albuquerque) 12% (1,195) and Community Against Violence (660), *La Casa* (659), and Enlace Comunitario (658) (6%, respectively). See **Table 19**.

- ▶ Sources of Adult Victim Referrals and The Number Referred from Each **Table 18**
- ▶ Crisis/Hotline Calls By Agency **Table 19**
- ▶ Crisis/Hotline Calls by County **Table 20**

The service that most adult victims received was crisis intervention (55%), followed by case management (51%), emergency shelter and counseling (24%, respectively), and legal advocacy and orders of protection (22%, respectively). See **Figure 18**.

Figure 18. Percent of Adult Victims Receiving Each Type of Service Provided by Domestic Violence Service Providers

- ▶ Five-Year Trends in the Number of Adult Victims Served And the Number Receiving Each Service for Each County
- ▶ Five-Year Trends in the Number of Crises/Hotline Calls for Each County

Section 3F
Section 3G

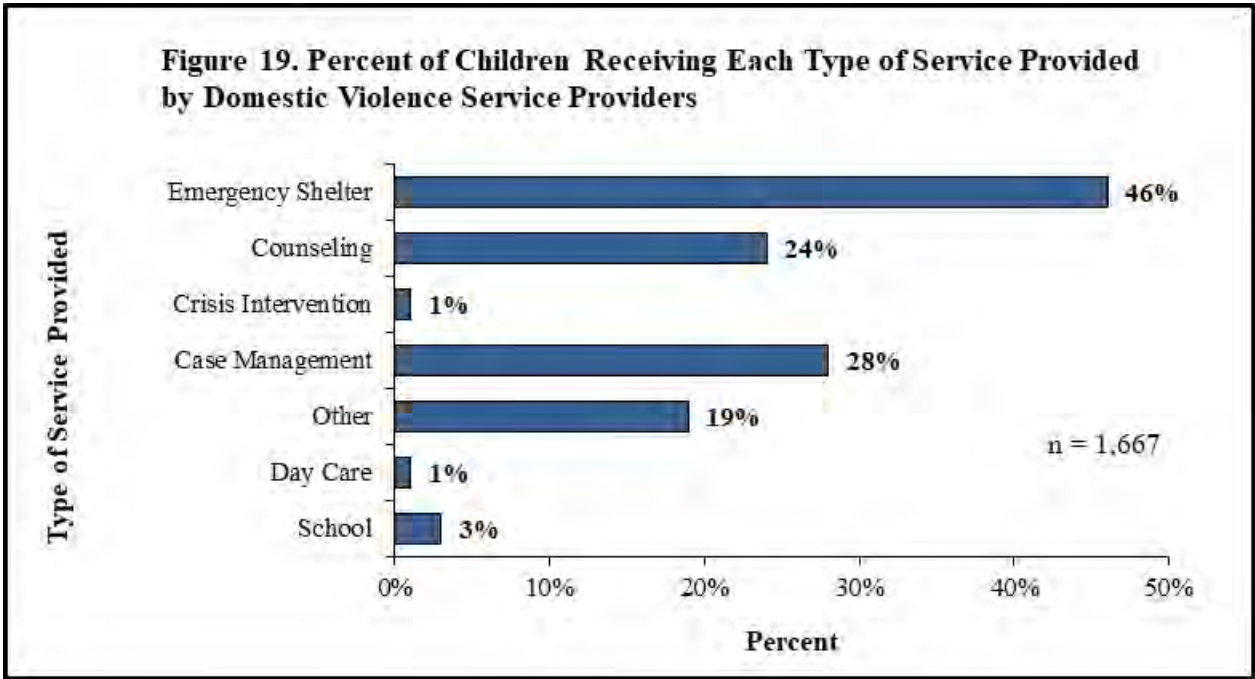

R. Sources of Child Referrals for Help and Services They Receive

Of 930 child referrals, most (65%) were referred by a family member/relative, followed by those who were self-referred (8%). Fourteen percent were referred by unspecified “other” sources.

- ▶ Sources of Children Referrals and The Number Referred from Each.

Table 21

The specified service that most children received was emergency shelter (46%), followed by case management (28%), and counseling (24). See **Figure 19**.

- Five-Year Trends in the Number of Children Served And the Number Receiving Each Service for Each County

Section 3H

S. Sources of Offender Referrals for Help and Services They Receive

Of 661 offender referrals, most (72%) were referred for services by adult court, followed by CYFD-CPS (13%), and self-referred (7%).

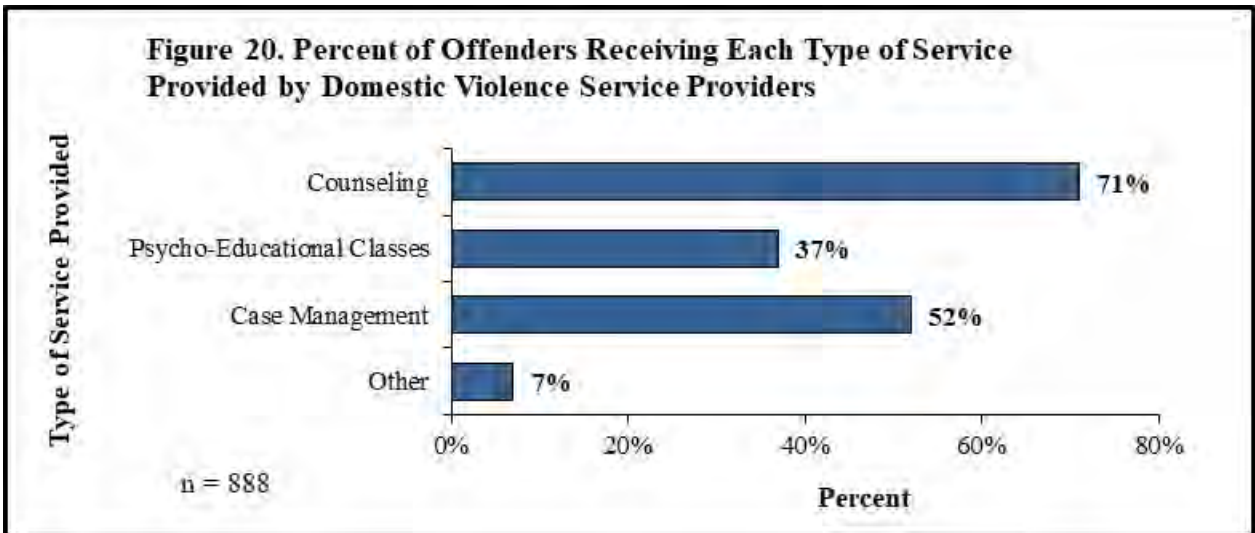

- Sources of Offender Referrals and The Number Referred from Each

Table 22

Most (71%) offenders received counseling services, followed by case management (52%), and psycho-educational classes (37%). Seven percent of offenders received “other” unspecified services. See **Figure 20**.

- Five-Year Trends in the Number of Offenders Served And the Number Receiving Each Service for Each County

Section 3J

T. Adult Victims Who Sought Help and Reported Their Domestic Violence Incident to Police

There were 4,423 reports that identified victim-reporting to law enforcement. Of these, 47% (2,132) reported their domestic violence incident to law enforcement.

- ▶ Percent Domestic Violence Incidents Reported to Law Enforcement by Service Provider Agency **Table 23**

U. Law Enforcement Domestic Violence Incidents That Resulted in A Suspect Arrest

- ▶ Number of Law Enforcement-Reported Domestic Violence Incidents Documenting Arrest Status 17,017
- ▶ Number of These With a Suspect Arrest 9,906 (58%)
- ▶ Number of Domestic Violence Incidents With No Arrest 7,111 (42%)
- ▶ Arrest Rates of All Law Enforcement Agencies **Table 24**
- ▶ Arrest Rates for All Counties **Table 25**

- ▶ Five-Year Trends in the Percent of Suspect Arrests for Each County **Section 3J**

V. Adult Victims of Domestic Violence Who Filed A Protection Order

- ▶ Number of Law Enforcement-Reported Domestic Violence Cases 20,144
- ▶ Number of Cases for Which a Protection Order was Issued in District Courts 7,551 (37%)

- ▶ Number of Cases for Which a Protection Order was Issued in District Courts by County **Table 26**

In counties with the most complete reporting (those with the law enforcement agency from the largest city in the county reporting) and with a minimum of 20 cases, a comparison was made between the number of protection orders filed in district courts in each county and the number of domestic violence cases reported to law enforcement in each county. Quay County had the highest number of protection orders filed in district court relative to the number of domestic violence incidents reported by law enforcement (187%), followed by Colfax County (107%), Valencia County (80%), San Miguel County (76%), and Torrance and Rio Arriba Counties (73%, respectively). McKinley County had the fewest number of protection orders filed in district court relative to the number of domestic violence incidents reported by law enforcement (13%), followed by Dona Ana County (20%) and Bernalillo and Los Alamos County (28%, respectively). See **Figure 21**.

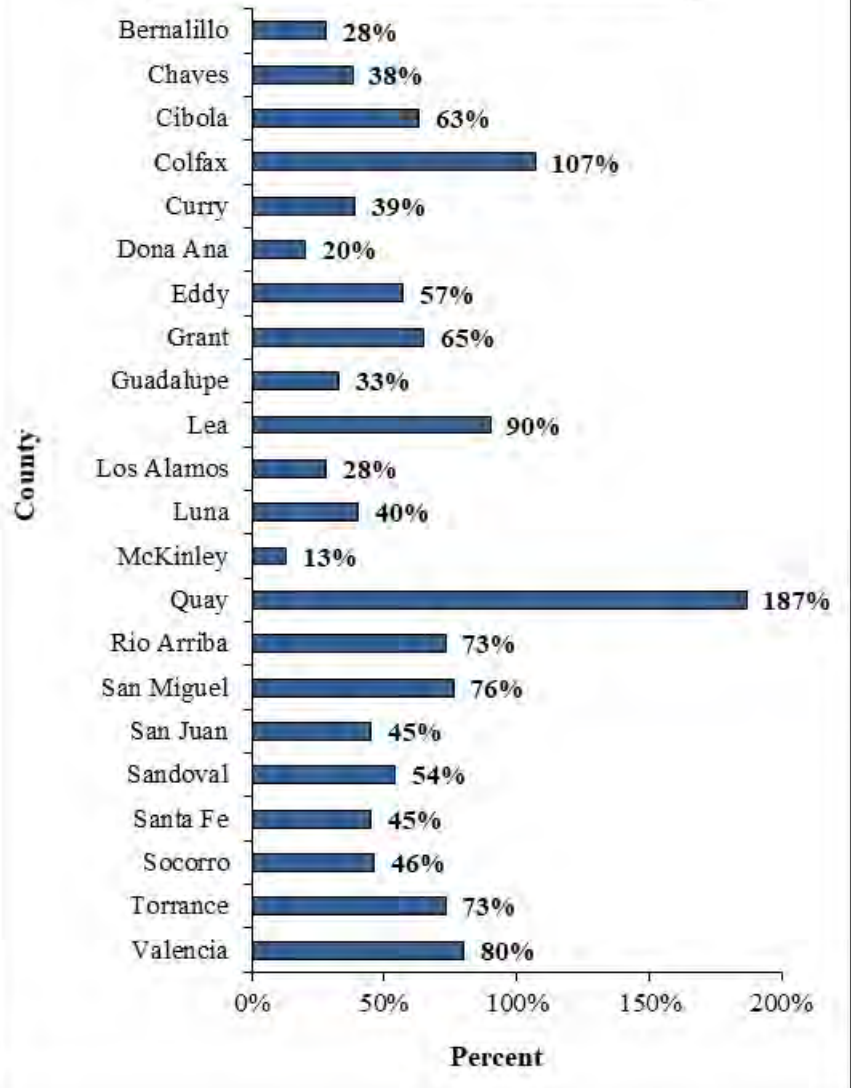

- ▶ Percent Law Enforcement Incidents Represented by District Court Protection Orders Issued for All Counties **Table 27**
- ▶ Five-Year Trends on the Percent of Law Enforcement Domestic Violence Incidents Represented by District Court Protection Orders Issued for Each County **Section 3K**

- ▶ Total Number of Domestic Violence-Related Protection Orders Issued in District Courts in 2020, by County **Table 28**

Service Providers assisted 1,326 domestic violence victims to file 10% (1,626) of the total 16,072 protection orders issued by district courts in 2020.

Figure 21. Percent of Protection Orders Filed in District Courts Relative to The Number of Domestic Violence Incidents Reported by Law Enforcement, Per Selected Counties

District Court Protective Orders n = 6,660
 Law Enforcement DV Cases n = 19,315

IV. DISTRICT AND MAGISTRATE COURT FINDINGS

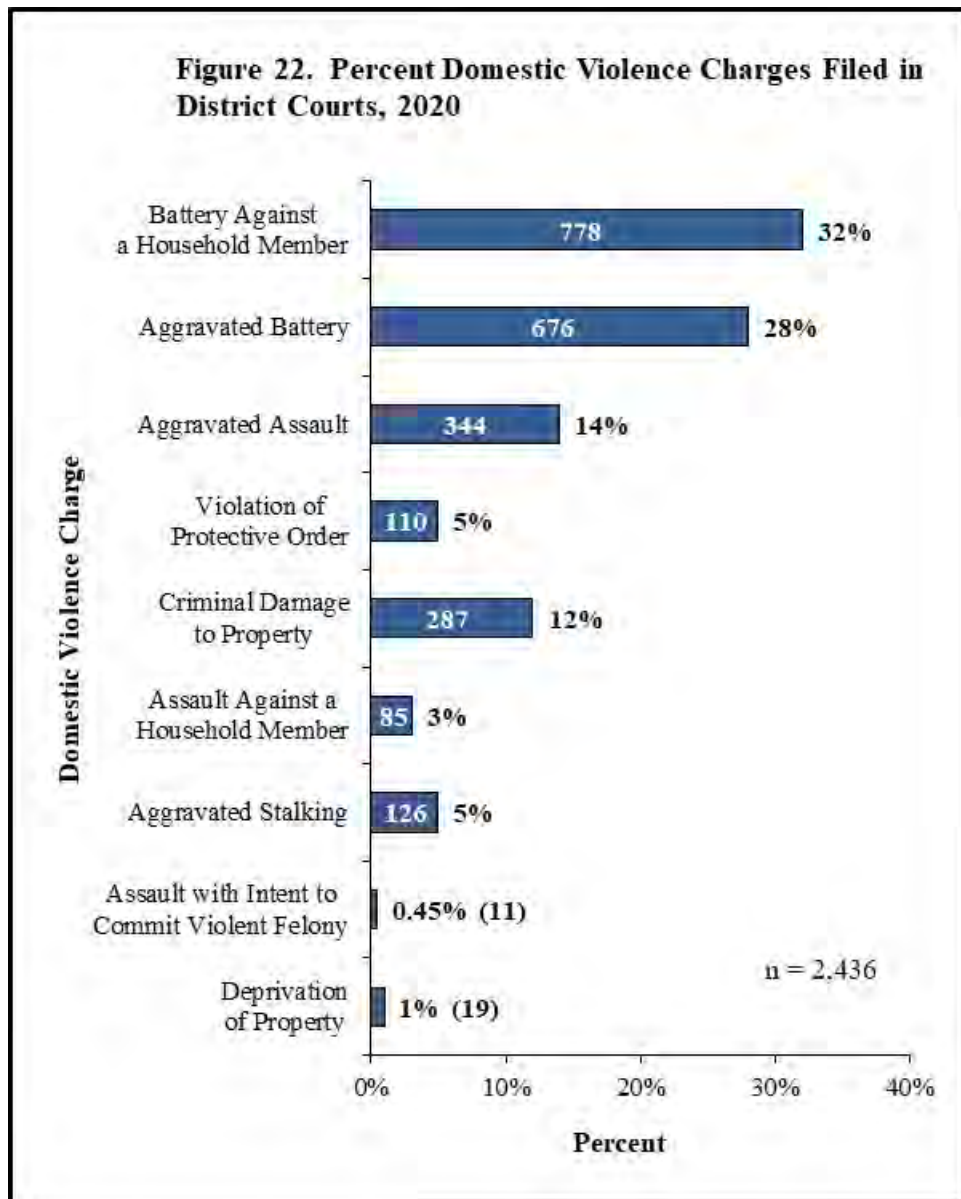

In 2020, the Central Repository in collaboration with the Administrative Office of the Courts (AOC) was able to identify and extract valuable district and magistrate court data and the type of disposition outcomes for domestic violence cases. County totals on domestic violence cases filed, and conviction and dismissal rates on domestic violence cases disposed in district and magistrate courts for 2020, are found in *Section Three, Tables L - O*.

Additionally in 2020, the Central Repository has obtained new cases of *false imprisonment*, as well as *harassment*, *stalking*, and *aggravated stalking* where the domestic relationship, while likely, could not be confirmed from the documentation provided from the courts. Therefore, these data are presented separately.

A. District Courts

1. New Domestic Violence Charges and Cases Filed in District Courts, 2020

There were a total of 2,436 domestic violence charges filed in 1,604 new cases of domestic violence in New Mexico district courts, in 2020. This represents a 13% decrease from the number of cases filed in 2019 (1,851). See **Appendix L** for a list of participating statewide district courts. All charges/cases are against a household member. *Battery* comprised most (32%) of the charges, followed by *aggravated battery* (28%), *aggravated assault* (14%), *criminal damage to property* (12%), *violation of a protection order* and *aggravated stalking* (5%, respectively), *assault* (3%), *deprivation of property* (1%), and *assault with intent to commit a violent felony* (<1%) (0.45%). See **Figure 22**.

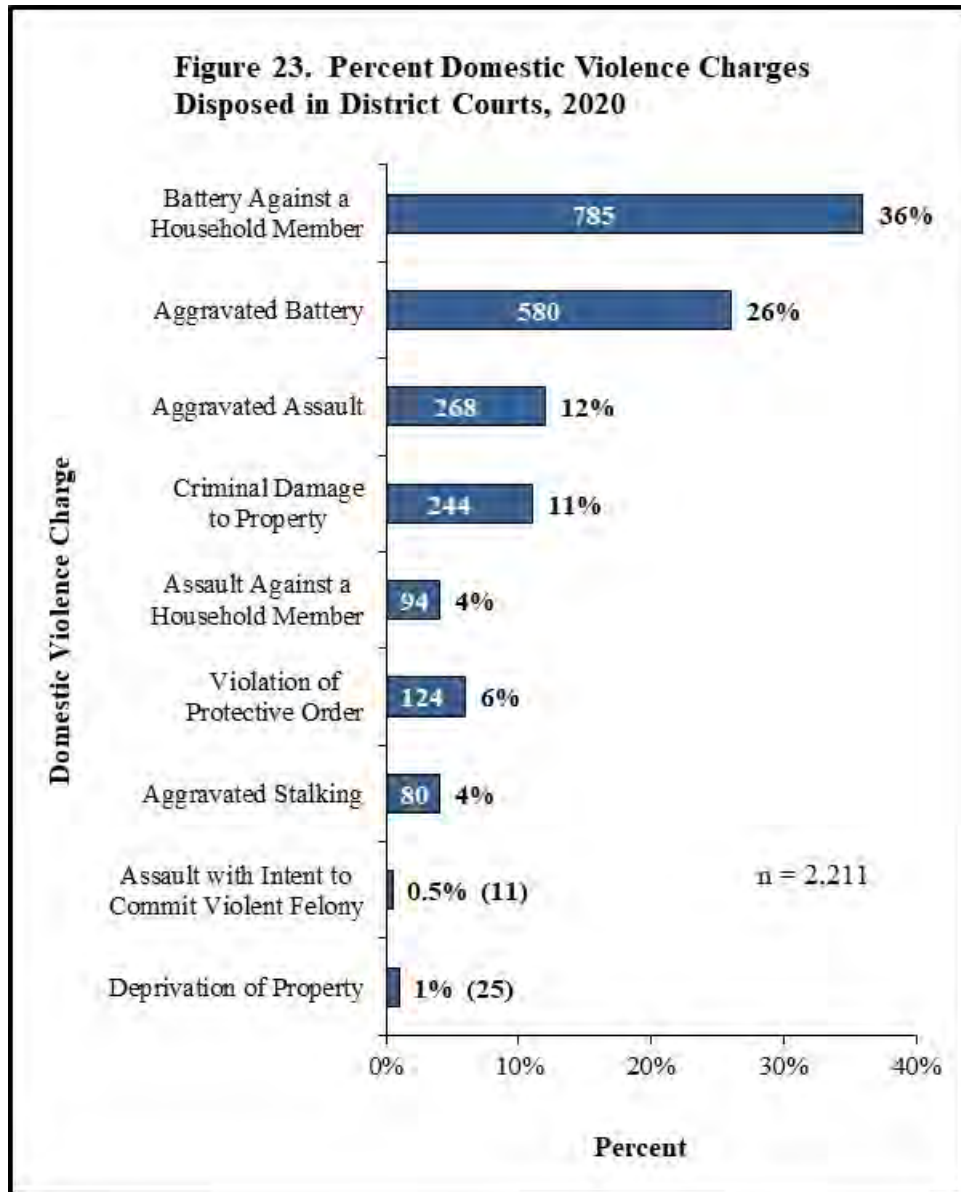

One-fifth (21%) of all domestic violence cases were filed in Bernalillo County. San Juan County comprised 9% of domestic violence cases filed in 2020, followed by Dona Ana County (7%) and Chaves, Otero, and Santa Fe counties (6%, respectively). See **Table 29**.

2. Domestic Violence Charges and Cases Disposed in District Courts, 2020

There were 2,211 domestic violence charges disposed in 1,422 cases of domestic violence in New Mexico district courts, in 2020. This represents a 20% decrease from the number of cases disposed in 2019 (1,785). Of the disposed domestic violence charges, most (36%) were *battery*, followed by *aggravated battery* (26%), *aggravated assault* (12%), and *criminal damage to property* (11%). See **Figure 23** for the proportion of each type of domestic violence crime disposed in 2020.

One-quarter (23%) of all domestic violence cases in district courts in 2020, were disposed in Bernalillo County. Dona Ana and San Juan counties comprised 8% respectively, of disposed domestic violence cases, followed by Santa Fe County (6%), and Chaves, Curry and Otero counties (5%, respectively). See **Table 30**.

3. Dispositions of Domestic Violence Cases Disposed in District Courts, in 2020

Of the 1,422 cases of domestic violence disposed in district courts in 2020, 31% (447) obtained a guilty plea/conviction, <1% (0.35%) (5) obtained an acquittal, 54% (769) were dismissed, and 14% (201) had prosecution proceedings that resulted in “other” dispositions (conditional discharges, remands, consent decrees, deferred cases, and transferred cases). See **Figure 24**.

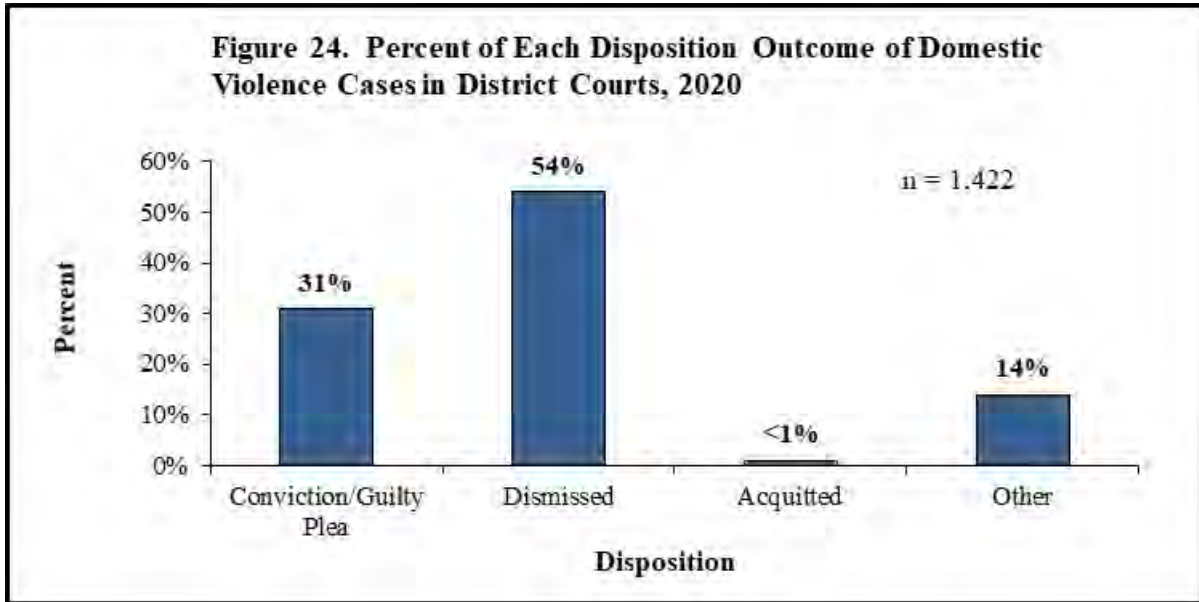

Table 31 illustrates the number of cases dismissed, convicted, and acquitted for each district court.

An examination of dismissed cases by district court (among courts with 10 or more domestic violence cases) shows that Estancia and Lovington District Courts had the highest dismissal rates of their disposed domestic violence cases (74% respectively), followed by Tierra Amarilla District Court (71%), Gallup District Court (70%), Los Lunas District Court (65%), Bernalillo District Court (63%), and Albuquerque District Court (62%). See **Table 32** for the percent of domestic violence cases dismissed for all District Courts, in 2020.

Similarly, an examination of cases that obtained a guilty plea/conviction by district court (among courts with 10 or more domestic violence cases) shows that Clayton District Court had the highest conviction rate of their disposed domestic violence cases (60%), followed by Alamogordo District Court (58%), Carrizozo District Court (55%), and Raton District Court (52%). Conversely, Bernalillo District Court had the fewest domestic violence cases with a conviction (12%), followed by Las Vegas District Court (14%), Tierra Amarilla District Court (17%), Lovington District Court (18%), and Estancia District Court (19%). See **Table 33** for the percent of domestic violence cases with a conviction/guilty plea for all District Courts, in 2020.

4. District Court Protection Orders Issued

In 2020, there were 16,072 protection orders issued by statewide district courts for one or more parties involved in 7,551 new domestic violence-related cases. The total number of orders of protection issued represents a 39% increase over the number issued in 2019 (11,581). The number of domestic violence-related cases for which an order of protection was issued represents a 13% increase over the number of the cases in

2019 (6,675). Of the protection orders issued, 1% (235) were emergency protection orders, 73% (12,623) were domestic violence temporary orders of protection, and 20% (3,214) were judgments for permanent protection orders.

Of the 235 emergency protection orders issued in 2020, over half (51% or 121) were issued in Bernalillo County, followed by Dona Ana County, 19% (45), Sandoval County, 9% (22), Santa Fe County, 7% (16), and Grant County, 4% (10). Luna (5) and Taos (4) comprised 2% respectively, of the emergency protection orders issued and Colfax (2) and San Juan (2) counties comprised 1%, respectively. See **Table 34** for a list of emergency protection orders issued by county.

Of the 12,623 judgments for temporary protection orders issued in 2020, most (37% or 4,646) were issued by Bernalillo County, followed by Lea (881) and Sandoval (857) counties (7%, respectively), Santa Fe County, 6% (727), and Otero (681), Valencia (602), and Dona Ana (599) counties (5% respectively). See **Table 35** for a list of temporary protection orders issued by county.

Of the 3,214 judgments for permanent orders of protection issued in 2020, most (29% or 947), were issued by Bernalillo County. Lea County issued 10% (312) of all permanent protection orders, followed by Santa Fe (225) and Valencia (215) counties (7%, respectively), Dona Ana County, 6% (184) and San Juan County, 5% (163). See **Table 36** for a list of domestic violence permanent orders of protection issued by county.

5. Harassment, Stalking/Aggravated Stalking, and False Imprisonment Cases Filed in District Courts, 2020

While most harassment, stalking/aggravated stalking, and false imprisonment charges/cases are domestic-related, in some of the district court cases of these offenses, the victim/offender relationship was not documented to determine whether the offense was domestic in nature. However, the total number of all stalking/aggravated stalking cases, harassment cases, and false imprisonment cases are being presented to provide a more credible source than law enforcement-reported data on the annual incidents of reported harassment, stalking/aggravated stalking, and false imprisonment crimes.

Over all, there was a significant decrease in false imprisonment, harassment and stalking/aggravated stalking cases in statewide district courts in 2020 compared to 2019. There were 420 false imprisonment cases in 2020, a 20% decrease from 2019 (528); 27 harassment cases in 2020, a 48% decrease from 2019 (52); and 135 stalking/aggravated stalking cases in 2020, a 14.5% decrease from 2019 (158). See **Table 37** for the number of new cases of these crimes filed in each district court.

Stalking and Aggravated Stalking Cases Disposed in District Courts, 2020

There were 87 stalking/aggravated stalking cases disposed in statewide district courts, in 2020. This represents a 30% decrease from these crimes disposed in 2019 (125). Albuquerque District Court comprised 18% (16) of all the district court stalking and aggravated stalking cases that were disposed, followed by Bernalillo District Court, 8% (7), Carlsbad and Raton District Courts (7%, 6 respectively) and Alamogordo, Lovington, Roswell, Santa Fe District Courts, 6%, 5 respectively). See **Table 38**. Forty-four percent (38) of stalking/aggravated stalking cases were dismissed, 45% (39) obtained a conviction, 1% (1) obtained an acquittal, and 10% (9) resulted in other dispositions (deferred cases, bind-over cases, transferred cases, and conditional discharge cases). See **Figure 25**.

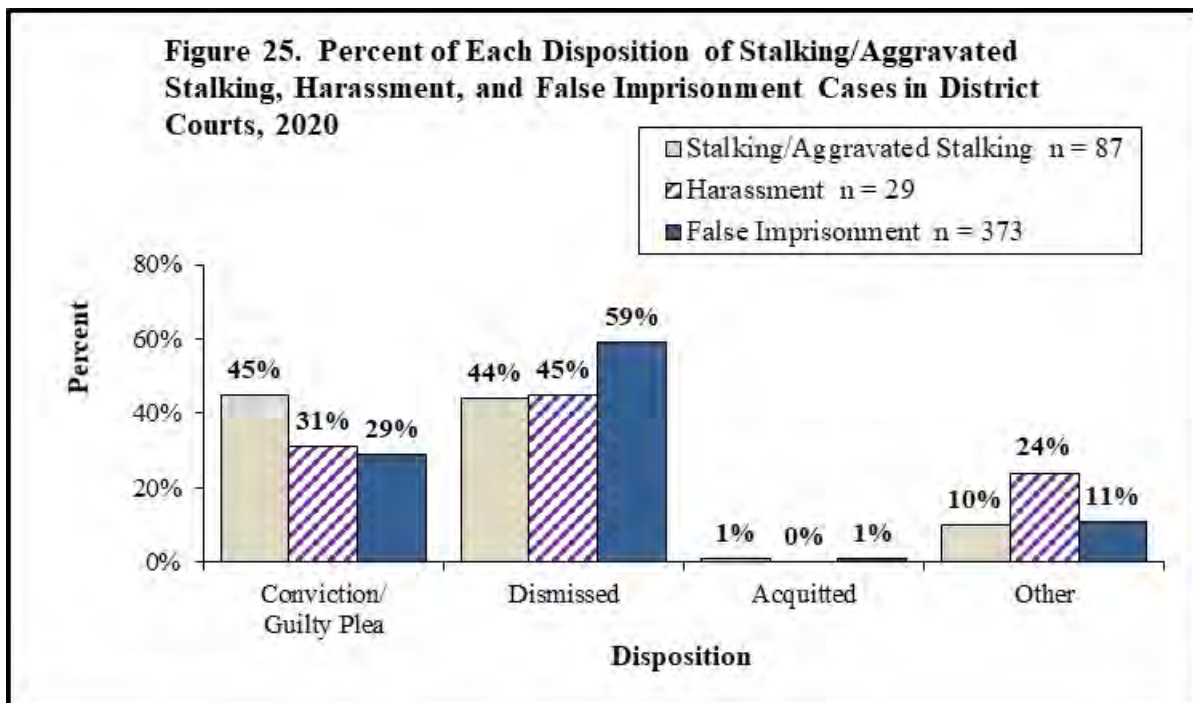

Harassment Cases Disposed in District Courts, 2020

There were 29 harassment cases disposed in statewide district courts, in 2020. This represents a 27% decrease from these crimes disposed in 2019 (40). Over one-quarter, 28% (8) were disposed in Albuquerque District Court, followed by 17% (5) in Las Cruces District Court, 10% (3) in Alamogordo District Court, and 7%, 2 respectively, in Carlsbad and Carrizozo District Courts. See **Table 39**. Forty-five percent (13) of the harassment cases disposed in district courts were dismissed, 31% (9) obtained a conviction, and 24% (7) resulted in “other” dispositions (deferred cases, bind-over cases, transferred cases, and conditional discharge cases). Refer to Figure 25.

False Imprisonment Cases Disposed in District Courts, 2020

There were 373 false imprisonment cases disposed in statewide district courts, in 2020. This represents a 20% decrease from these crimes disposed in 2019 (466). Albuquerque District Court comprised 35% or 129 of the false imprisonment cases that were disposed, followed by Aztec/Farmington District Court, 9% (33), Clovis and Santa Fe District Courts, (6%, 22 respectively) and Los Lunas District Court, 5% (19). See **Table 40**.

Of the 373 false imprisonment cases disposed in district courts, 59% (221) were dismissed, 29% (108) obtained a conviction, and 1% (3) obtained an acquittal. The remaining 11% (41) were cases with “other” dispositions (conditional discharges, deferred charges, bind-over, and remand charges), all of which demonstrated prosecution proceedings that did not result in a dismissal, conviction, or acquittal. Refer to Figure 25.

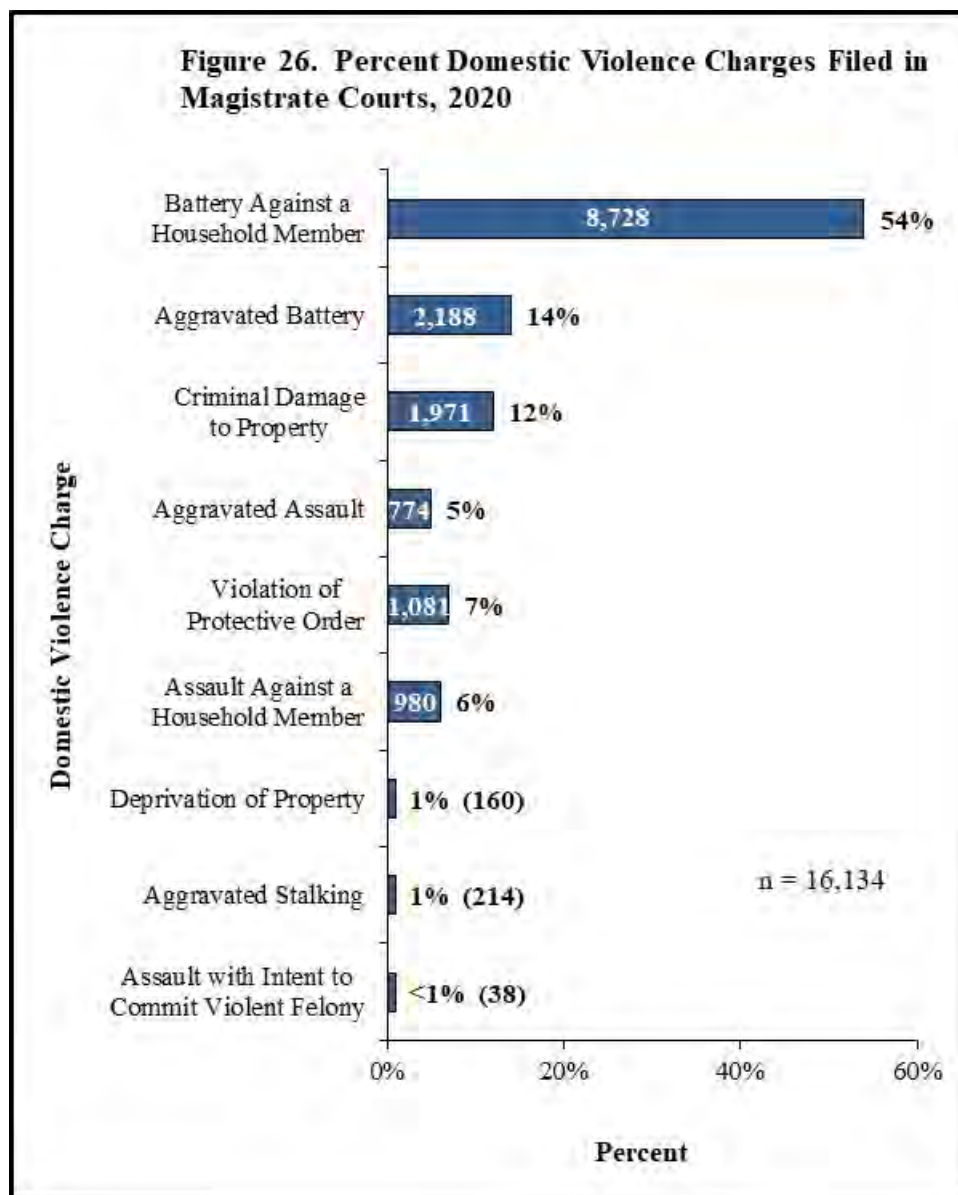

B. Magistrate Courts

1. New Domestic Violence Charges and Cases Filed in Magistrate Courts, 2020

There were a total of 16,134 domestic violence charges filed in 13,183 new cases of domestic violence in New Mexico magistrate courts, in 2020. This represents a 3% increase in cases filed in Magistrate Courts in 2019 (12,776). See **Appendix M** for a list of participating magistrate courts. All cases/charges are against a household member.

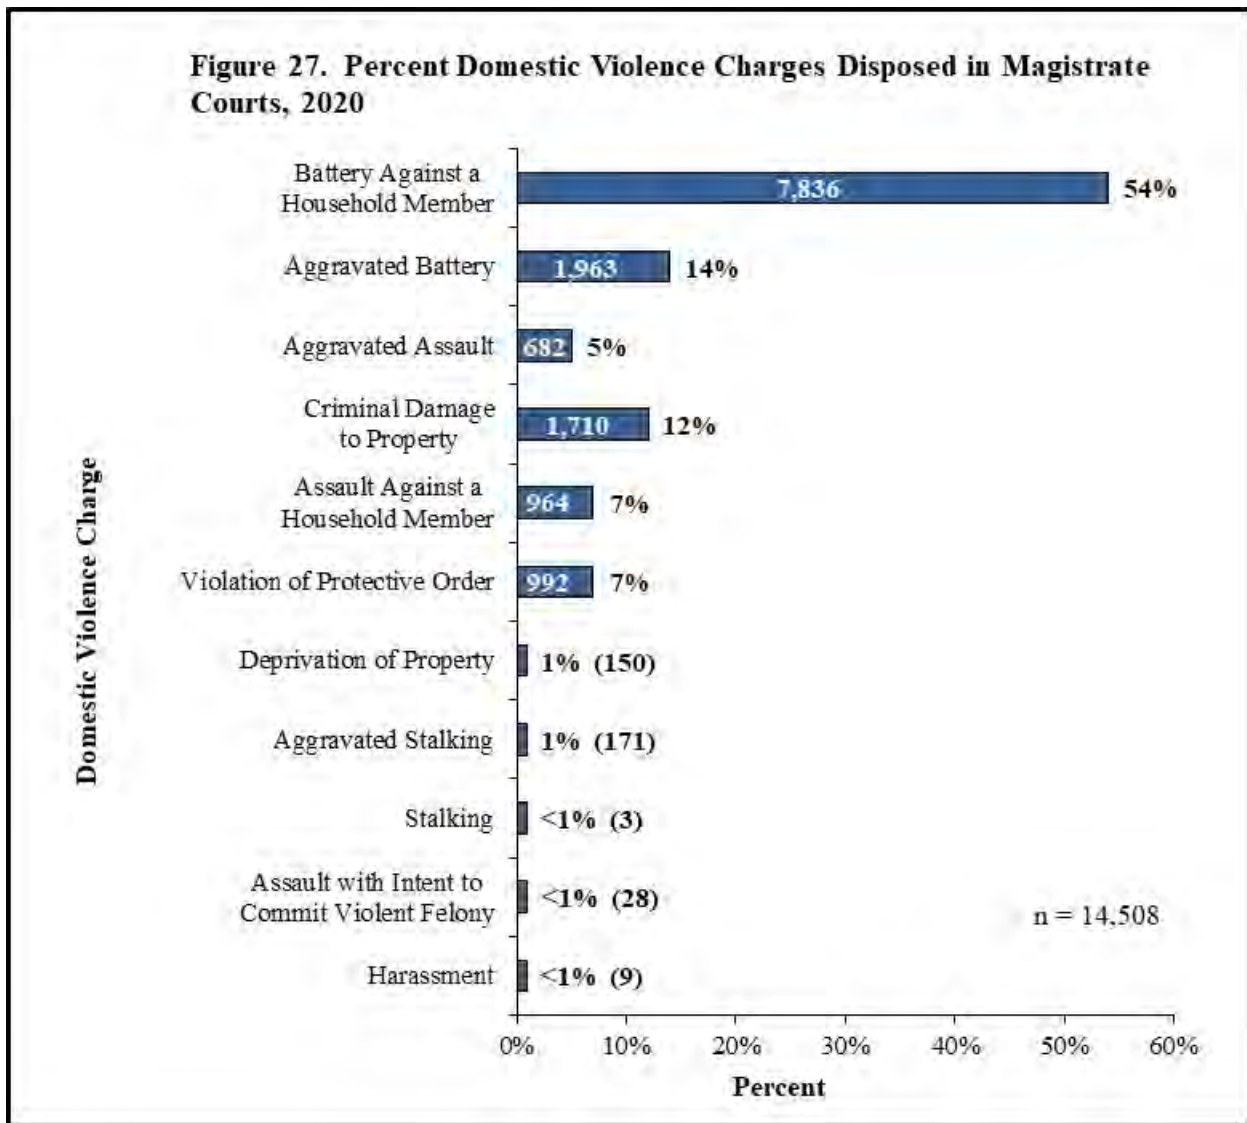

Bernalillo County comprised most (37%) of all the magistrate-metropolitan court domestic violence cases filed, followed by Dona Ana County, 10%, San Juan County, 8%, and Santa Fe County, 5%. See **Table 41** for the proportion of new cases filed by each county.

Battery comprised most (54%) of the new charges filed, followed by *aggravated battery* (14%), *criminal damage to property* (12%), *violation of a protection order* (7%), *assault* (6%), and *aggravated assault* (5%). See **Figure 26**.

2. Domestic Violence Cases Disposed in Magistrate Courts, 2020

There were 14,508 domestic violence charges disposed in 11,883 cases of domestic violence in magistrate courts, in 2020. The 11,883 cases represent a 3% decrease from the number of cases disposed in 2019 (12,277). Of the disposed domestic violence charges, most (54%) were *battery*, followed by *aggravated battery* (14%), *criminal damage to property* (12%), and *assault and violation of a protective order* (7%, respectively). See **Figure 27** for the proportion of each type of domestic violence charges disposed in 2020.

Bernalillo County comprised most (39%) of all the magistrate court domestic violence cases disposed in 2020, followed by Dona Ana County (9%), San Juan County (7%), Santa Fe County (6%) and Sandoval County (5%). See **Table 42** for the proportion of cases disposed by each county.

Of the 11,883 domestic violence cases disposed in magistrate courts, 83% (9,844) were dismissed, <1% (43) were acquitted, and 5% (623) obtained a guilty plea or conviction. The remaining 12% (1,373) were cases with “other” dispositions (deferred cases, transferred cases, bind over cases, and conditional discharge

cases) which demonstrated prosecution proceedings that did not result in a dismissal, conviction, or acquittal. See **Figure 28**.

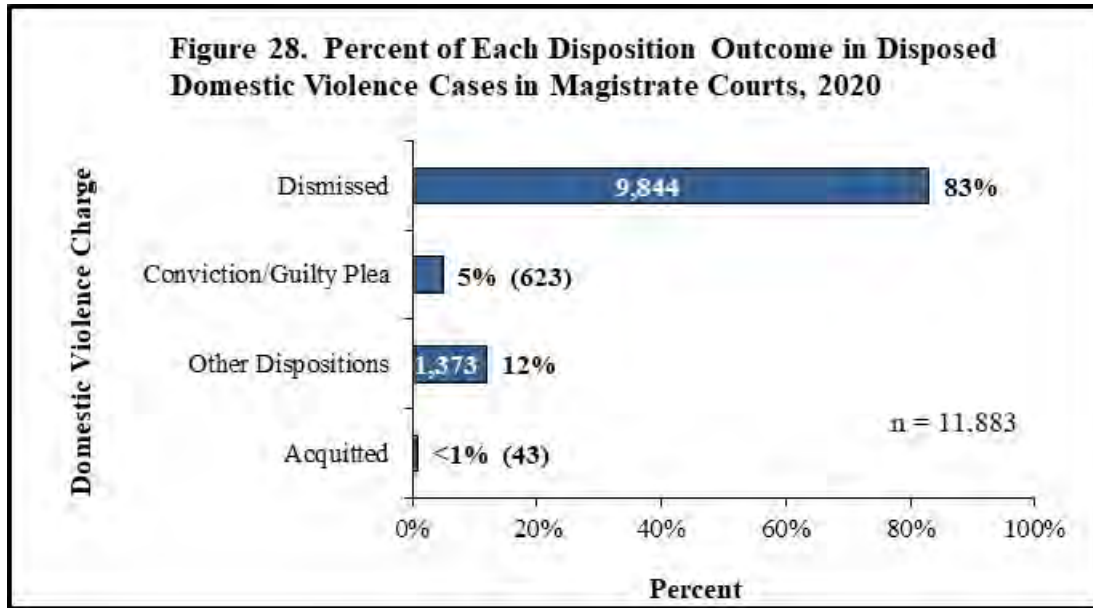

Table 43 illustrates the number of cases dismissed, convicted, acquitted, and other disposition outcomes for each magistrate court.

An examination of dismissed cases by magistrate courts (among courts with 10 or more domestic violence cases) shows that Cuba Magistrate Court had the highest dismissal rate of their disposed domestic violence cases (100%). The following magistrate courts had a dismissal rate of 90% or higher: Albuquerque Metro Court (95%), Anthony Magistrate Court (95%), Chama Magistrate Court (92%), Gallup Magistrate Court (92%), Bernalillo Magistrate Court (91%), Hobbs Magistrate Court (91%), and Lovington Magistrate Court (91%). Conversely, Fort Sumner Magistrate Court had the fewest dismissals (20%), followed by Ruidoso Magistrate Courts (28%), and Raton Magistrate Court (34%), and Tucumcari Magistrate Courts (38%). See **Table 44**.

Similarly, an examination of cases that obtained a guilty plea/conviction by magistrate court (among courts with 10 or more domestic violence cases) shows that Fort Sumner Magistrate Court had the highest conviction rate of its disposed domestic violence cases (60%), followed by Clayton Magistrate Court (50%), and Lordsburg Magistrate Court (43%). Conversely, Cuba and Eunice Magistrate Courts had the fewest domestic violence cases with a conviction (0%), followed by Albuquerque Metropolitan Court and Lovington Magistrate Court (1%, respectively) and Anthony, Bernalillo, Espanola, Hobbs, and Las Cruces Magistrate Courts (2%, respectively). See **Table 45**.

3. Harassment, Stalking/Aggravated Stalking, and False Imprisonment Charges and Cases Filed in Magistrate Courts, 2020

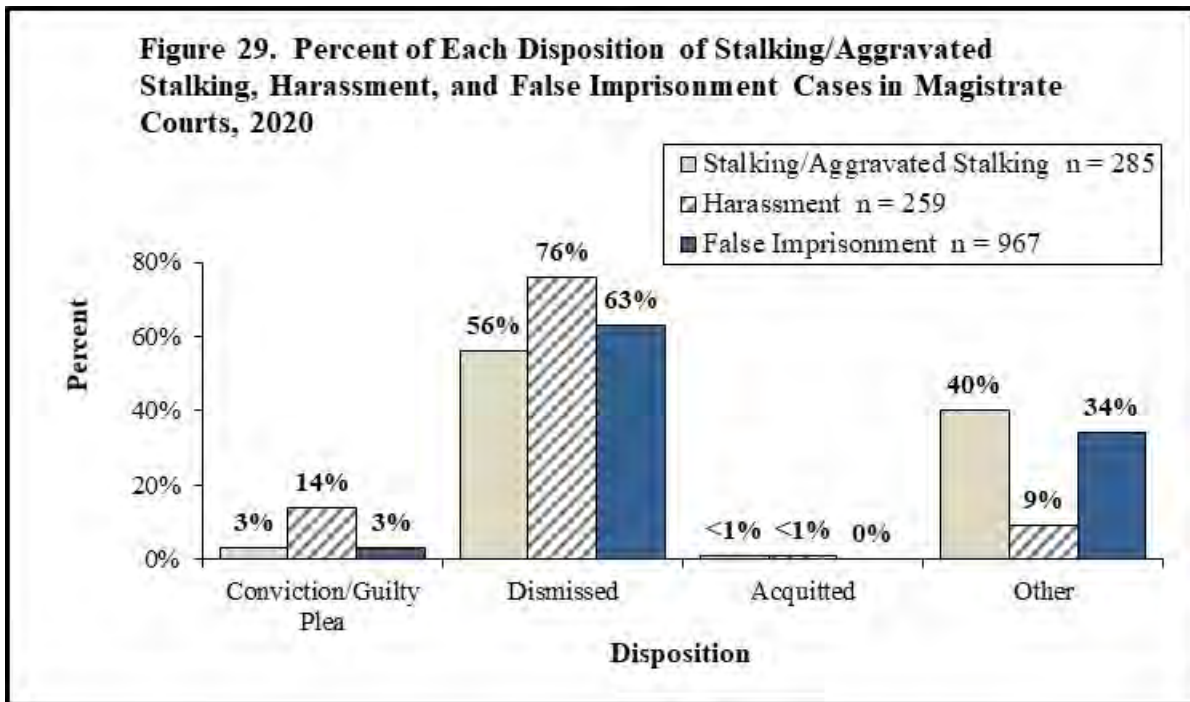

As discussed with the district courts, while most harassment, stalking/aggravated stalking, and false imprisonment charges/cases are domestic-related, in some of the magistrate court cases of these offenses, the victim/offender relationship was not documented to determine whether the offense was domestic in nature. However, the total number of all stalking/aggravated stalking cases, harassment cases, and false imprisonment

cases are being presented to provide a more credible source than law enforcement-reported data on the annual incidence of reported harassment, stalking/aggravated stalking, and false imprisonment crimes.

Over all, there were 1,052 false imprisonment cases, 271 harassment cases, and 346 stalking/aggravated stalking cases filed in magistrate courts, in 2020. To see the number of cases for each of these crimes filed in each magistrate court, see **Table 46**.

4. Harassment, Stalking/Aggravated Stalking, and False Imprisonment Cases Disposed in Magistrate Courts, 2020

There were 285 stalking/aggravated stalking cases that were disposed in statewide magistrate courts, in 2020. Albuquerque Metro Court comprised 22% (63) of all the magistrate court stalking and aggravated stalking cases that were disposed, followed by Bernalillo Magistrate Court, 11% (32), Santa Fe Magistrate Court, 10% (28), and Roswell Magistrate Court, 7% (19). See **Table 47**. Over half (56% or 160) of stalking/aggravated stalking cases were dismissed, 3% (9) obtained a conviction, <1% (1) were acquitted, and 40% (115) resulted in “other” dispositions (deferred cases, bind-over cases, transferred cases, and conditional discharge cases). See **Figure 29**.

There were 259 harassment cases disposed in statewide magistrate courts, in 2020. One-third (34%) (88) were disposed in Albuquerque Metro Court, followed by Las Cruces Magistrate Court, 12% (30) and Bernalillo (13) and Santa Fe (12) Magistrate Courts, 5%, respectively. See **Table 48**. Over three-quarters (76% or 197) of harassment cases disposed in magistrate courts were dismissed, 14% (37) obtained a conviction, <1% (1) obtained an acquittal and 9% (24) resulted in “other” dispositions (deferred cases, bind-over cases, transferred cases, and conditional discharge cases). Refer to Figure 29.

There were 967 false imprisonment cases disposed in statewide magistrate courts, in 2020. Albuquerque Metro Court comprised 28% (270) of the false imprisonment cases that were disposed, followed

by Santa Fe Magistrate Court, 8% (77), Farmington Magistrate Court, 7% (64) and Las Cruces Magistrate Court, 5% (49). See **Table 49**.

Of the 967 false imprisonment cases disposed in magistrate courts, 63% (608) were dismissed, 3% (32) obtained a guilty plea or conviction, 0% obtained an acquittal, and 34% (327) resulted in “other” dispositions such as bind-over cases, transferred cases, deferred cases, and conditional discharge cases which demonstrated prosecution proceedings that did not result in a dismissal, conviction, or acquittal. Refer to Figure 29.

V. COVID-19 PANDEMIC IMPLICATIONS FOR CHANGE

In 2019, the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) published a report on Biodiversity and Ecology that warned of future pandemics. In light of the 2020 COVID-19 pandemic, the IPBES held a transdisciplinary expert panel workshop in July 2020, to undertake a rapid assessment of the scientific evidence on the origin, emergence, and impact of COVID-19, as well as potential control and prevention options. In October 2020, the (IPBES) published a report that warned of the frequency and impact of future pandemics. The IPBES report cautioned that, “Without preventative strategies, pandemics will emerge more often, spread more rapidly, kill more people, and affect the global economy with more devastating impact than ever before.” (IPBES, 2020).

The events of 2020 have taught us that it is past time to take inventory of our capabilities to serve and protect during times of mass trauma. Government and the private sector must work together to take strategic action to address the range and scope of system failures during the COVID-19 pandemic that resulted in devastating human and economic costs. The IPBES stated that “it is clear that current reactive strategies which center on rapid containment and control following disease emergence are insufficient to fight future pandemics.” (IPBES, 2020).

To this end, recommendations from IPBES include evidence-based policy options that include five broad categories aimed at fundamentally transforming our relationship with nature: - establishing enabling mechanisms (which include a high-level intergovernmental council on pandemic prevention; developing policies to address the role of land-use change; developing policies related to wildlife trade; closing critical knowledge gaps; and fostering society-wide engagement in pandemic risk reduction.

Perhaps nowhere is the need to ensure that appropriate policies and systems are in place, communities well equipped and prepared, and response effectively coordinated during catastrophic events, than among those systems and professionals whose purpose it is to prevent domestic violence and further, effectively assist those who have been abused.

Lessons from the pandemic have shown that there is no aspect of domestic violence response that does not need to be analyzed and evaluated for determining the changes that are needed to ensure that, during catastrophic events: 1) at risk families are identified, know a way to seek help, and can access help; 2) helping agencies are adequately staffed with trained personnel, equipped, coordinated with each other, and funded to continue operations; and 3) staff is safe, with needed protections for themselves and their families that enable them to effectively continue to perform their work.

**INCIDENCE AND NATURE OF DOMESTIC VIOLENCE IN NEW MEXICO XIX:
An Analysis of 2020 Data from
The New Mexico Interpersonal Violence Data Central Repository**

APPENDICES

Appendix A: Life Experiences of Adult Survivors of Domestic Violence

The Adult Survivor Database (ASD) was developed to capture research information on individual domestic violence survivors who seek assistance from statewide domestic violence service providers. In 2012, eleven statewide service provider agencies began using the ASD. For calendar year 2012, there were 1,101 records available for analysis.

I. FINDINGS

A. Demographics

1. Survivor Gender, Race, Age, Sexual Orientation, Marital Status, and Language

Most domestic violence survivors were female (93%), Hispanic (56%) (see **Figure 1**), with a median age of 33 (see **Figure 2**). Sexual orientation was reported on only one-third (38%) of survivors, of which 95% were self-identified as heterosexual, 3% bisexual, and 2% lesbian. Marital status was not directly captured. However, when the survivor's relationship with the current abuser was documented, 27% were married and 6% were divorced.

One-quarter (24%) of domestic violence survivors speak a first language other than English. See Table A. A greater proportion of Spanish speaking survivors than survivors speaking other languages reported having difficulty with English: two-thirds (66%) of Spanish speaking survivors reported having difficulty with English, compared to 37.5% of Native speaking survivors, 7% of survivors of "other" languages, and 1% of English speaking survivors.

Table A. Survivor First/Preferred Language

First/Preferred Language	Number of Survivors	Percent Survivors
English	571	76%
Native American	8	1%
Other	15	2%
Portuguese	1	0.1%
Sign Language	3	0.4%
Spanish	149	20%
Total	747	100%

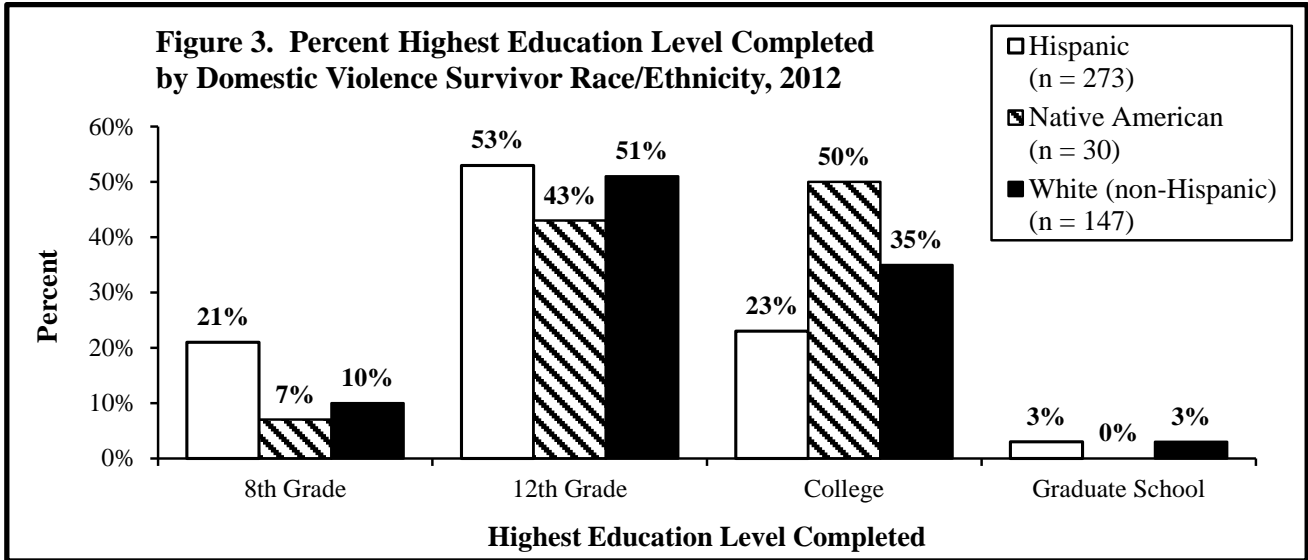

2. Survivor Education Level

Education level was reported for 478 survivors. Of these, 84% achieved a high school equivalent or higher education level. One-third (32% or 154) went to college or graduate school. Of 154 who went to college or graduate school, 79 (51%) completed their degree.

Education level was documented on too few Asian survivors (0), Black survivors (9), Pacific Islander survivors (1), survivors of mixed race (3) and survivors of "other" races (9) to validly examine. Among races/ethnicities that can be compared, 93% of Native Americans, 89% of Whites (non-Hispanic), and 79% of Hispanics completed high school or a higher level of education. Half (50%) of Native American survivors completed college or graduate school, compared to 38% of White (non-Hispanic) survivors and 26% of Hispanic survivors. **See Figure 3.**

3. Survivor Income

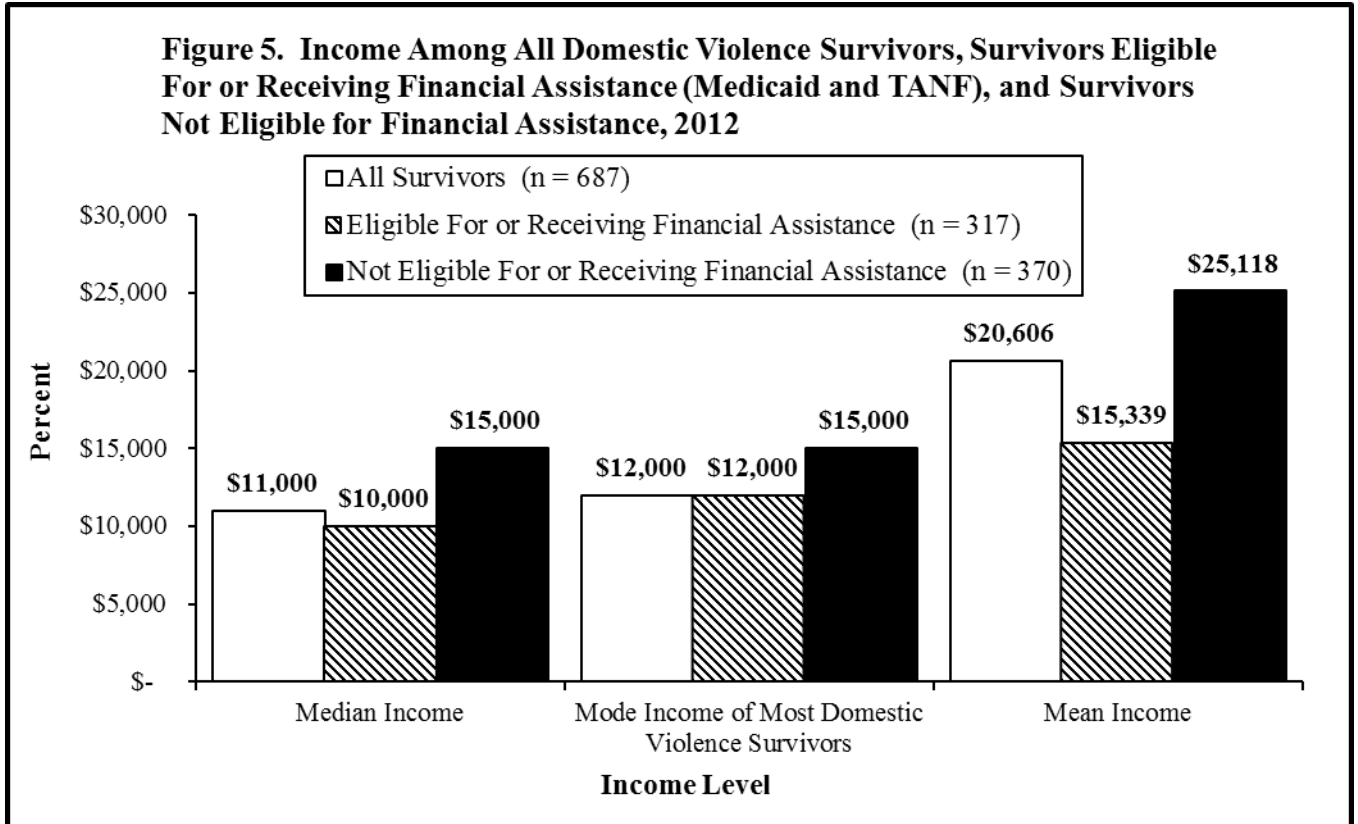

Slightly over one-third (39%) of survivors were enrolled in Medicaid (430), 13% (148) received TANF Assistance, and 11% (119) were involved in both programs. An examination of income by survivor race/ethnicity among those with a minimum of 20 survivors, reveals that "other" race was the one with the greatest proportion of survivors enrolled in Medicaid (60%), followed by Native Americans (48%), Blacks (46%), Hispanics (42%), and Whites (non-Hispanic) (31%). Native American survivors comprised the race with the greatest proportion receiving TANF assistance (20%) and involved in both Medicaid and TANF programs (16%). **See Figure 4.**

Of 687 survivors whose income was reported, the median income was \$11,000. Most (mode) survivors reported a yearly income of \$12,000. The average income was \$20,606.

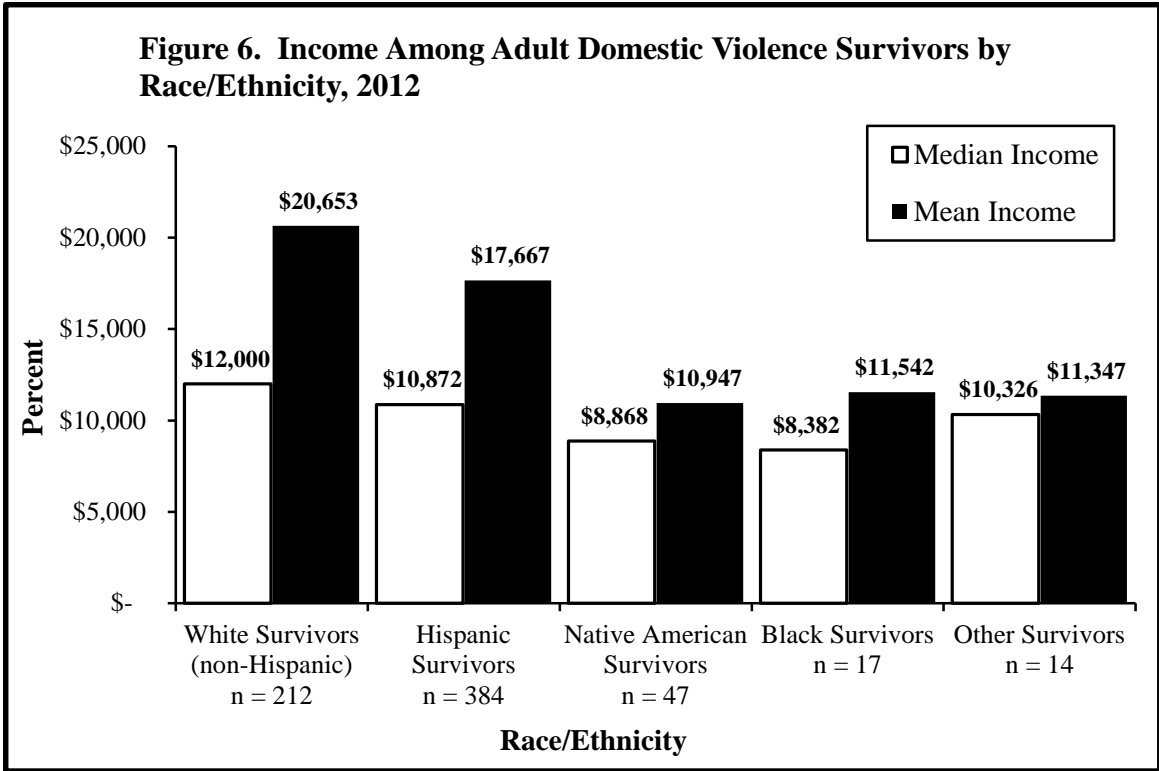

There were 642 survivors *not* eligible or receiving financial assistance (TANF and Medicaid). Of these, income was reported for 370 survivors. The median income was \$15,500. Most (mode) survivors not eligible or receiving financial assistance reported an income of \$15,000. Their average income was \$25,118.

There were 459 survivors who were eligible or receiving financial assistance. Of these, income was reported for 317 survivors. The median income was \$10,000. Most (mode) survivors eligible or receiving financial assistance reported an income of \$12,000. Their average income was \$15,339. See **Figure 5**.

Those survivors *not eligible/not receiving* financial assistance had a median income 50% higher, and an average income 64% higher, than those eligible/receiving assistance. However, the mean income of all survivors eligible/receiving or not, is \$11,000 - 4% below the federal poverty guideline's level of poverty for an individual (\$11,490); and well below the 133% (\$15,282) to 150% (\$17,235) of their income to qualify for federal assistance programs. In fact, 71% (490) of the 687 survivors with income reported had an actual income that would qualify them for federal assistance programs at the higher threshold of 150% of income, and 66% (456) would qualify for federal assistance programs at 133% of income.

An examination of income by race/ethnicity reveals that White (non-Hispanic) survivors reported the highest income (mean = \$20,653; median = \$12,000), followed by Hispanic survivors (mean = \$17,667; median \$12,000), survivors of "other" races (mean = \$11,347; median = \$10,326), Native American survivors (mean = \$10,947; median = \$8,868) and Black survivors (mean = \$11,542; median = \$8,382). See **Figure 6**.

4. Survivor Living Status

Over half (55%) of survivors did *not* live in their own rented apartment or own a home: 25% lived in shelter, 23% lived with a friend or relative, 3% were homeless/ living on the street, 2% lived with the offender, and 1% lived in transitional housing. See **Figure 7**.

When living status was examined by survivor income, significantly fewer survivors who need financial assistance live in an apartment or their own home: over half (57%) of survivors not eligible/not receiving financial assistance (TANF or Medicaid) live in a rented apartment or own home, compared to 42% of survivors who are eligible/receive assistance. Similarly, a significantly greater proportion (29%) of those eligible/receiving assistance, than those not eligible/not receiving assistance (15%), live with a friend or relative. See **Figure 8**.

Survivor Family of Origin and Childhood Experiences

1. Witnessing Family Violence As A Child and Child Abuse

One-third of domestic violence survivors reported that they witnessed family violence as a child. Children who witnessed family violence were four times more likely (59%) to experience child abuse than children who did not witness family violence (14%).

Over one-quarter (29%) of survivors reported actually being abused as a child. More female survivors reported witnessing (35%) and experiencing (30%) family violence, than male survivors (24% and 17%, respectively). However, this rate difference between genders should be viewed with caution as the number of male domestic violence survivors is relatively few (75).

When witnessing abuse and experiencing child abuse were examined by race/ethnicity, more Black survivors (58%) reported witnessing abuse, and more survivors of “other” races (50%) reported experiencing actual abuse. Fewer Hispanic survivors than survivors of all other races, reported witnessing (30%) or experiencing (23%) child abuse. See **Figure 9**.

Of 322 victims abused as a child, 304 specified the type of abuse experienced. Of these, 68% (208) experienced physical abuse, 68% (206) emotional abuse, and 50% (153) sexual abuse as a child. One-quarter (26% or 80) of victims experienced all three types of abuse. One-third (31% or 95) experienced physical and sexual abuse; one-half (52% or 158) experienced physical and emotional abuse; and one-third (30% or 90) experienced sexual and emotional abuse.

2. Parental substance abuse and mental illness

Nine percent (103) of domestic violence survivors reported growing up with a parent with a substance abuse problem. Five percent (55) of domestic violence survivors reported growing up with a parent with a mental illness.

Domestic violence survivors with a parent with mental illness, than survivors with a parent without mental illness, were 8 times more likely to also have a parent with a substance abuse problem: over half (58%) of survivors with a parent with mental illness compared to 7% of survivors with a parent without mental illness, reported having a parent with a substance abuse problem.

3. Child/Abuser relationship

Of 322 victims abused as children, 232 reported the relationship to their abuser. Of these, 84% (195) were abused by a family member, 25% (58) by a non-family member, and 3% (8) by a stranger. One survivor (.04%) was abused by a family member, non-family member, and a stranger; 24 (10%) were abused by both a family member and non-family member. Three survivors (1%) were abused by a family member and a stranger; and 3 (1%) were abused by a non-family member and a stranger.

Among survivors who experienced child abuse, there was a slight difference in the victim/abuser relationship and the likelihood to have suicide thoughts and attempt suicide. One-third (30%) of survivors abused as children by a family member thought about suicide and 21% attempted suicide. Similarly 28% of survivors abused as children by a non-family member thought about suicide and 17% attempted suicide.

4. In Shelter as A Child

One percent (16) of domestic violence survivors reported being in a domestic violence shelter as a child. As this number is so few, it cannot validly be examined by other factors.

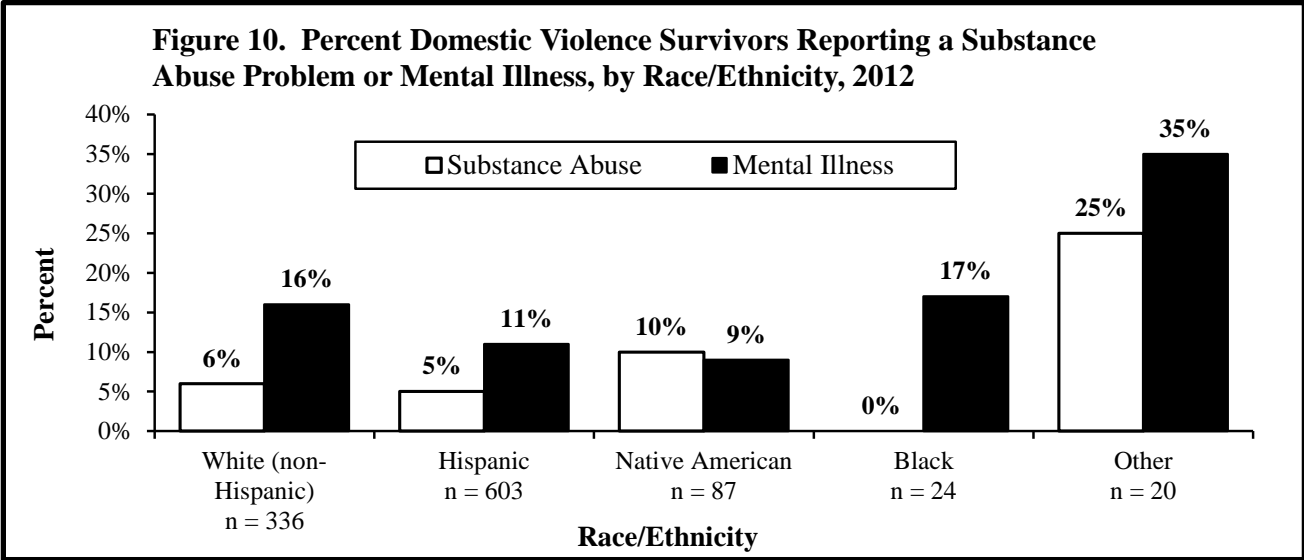

B. Survivor Risk Factors

1. Survivor Substance Abuse and Mental Illness

Overall, six percent (69) of domestic violence survivors were told they have a substance abuse problem. Six percent (63) of female survivors and eight percent (6) of male survivors reported being told they have a substance abuse problem.

Thirteen percent of survivors were told they have a mental illness. In this analysis with few (75) male survivors, slightly more males (15%) than females (13%) were told they had a mental illness.

When survivor substance abuse and mental illness were examined by race/ethnicity, more survivors of “other” races, reported mental illness (35%) and having a substance abuse problem (25%) than survivors of all other races/ethnicities. See **Figure 10**. As there are relatively few survivors of “other” races (20) and Black survivors (24), these findings should be viewed with caution.

Survivors abused as a child (12%) were three times more likely than survivors who did not experience child abuse (4%), to be told they have a substance abuse problem.

Survivors abused as a child (26%) were four times (3.7) more likely than survivors who did not experience child abuse (7%), to be told they have a mental illness.

Survivors told they have a mental illness were five times more likely than survivors without mental illness to have a substance abuse problem: Of 142 survivors told they have a mental illness, 28 (20%) were also told they have a substance abuse problem. Of 959 survivors not told they have a mental illness, 41 (4%) have been told they have a substance abuse problem.

Five percent of survivors reported having a parent with a mental illness. However, survivors who were told they have a mental illness were 12.5 times more likely (25%) to have a parent with mental illness, than survivors without mental illness (2%).

2. Suicide Ideology and Attempts

Overall, 15% (168) of domestic violence survivors thought about suicide, and 9% (98) reported at least one suicide attempt. When examined by gender, more female survivors, 16% (162), than male survivors, 7% (5) reported thinking about suicide; and more female survivors, 9% (96), than male survivors, 3% (2) reported at least one suicide attempt.

When suicide ideology and attempts were examined by race/ethnicity, slightly more survivors (25%) of “other” races thought about and attempted (15%) suicide than all other races/ethnicities. See **Figure 11**. As there are relatively few survivors of “other” races (20) and Black survivors (24), these findings should be viewed with caution.

Those abused as a child were three times more likely than those not abused to report thinking about suicide: of 322 victims abused as children, 30% (96) reported that they thought about suicide. Of 779 not abused as children, 9% (72) thought about suicide. Those abused as children were four times more likely (19%) than those not abused (5%) to attempt suicide.

Figure 11. Percent Domestic Violence Survivors That Thought About and/or Attempted Suicide, by Race/Ethnicity, 2012

Survivors who experienced emotional abuse, alone or in combination with physical and/or sexual abuse were more likely to attempt suicide than those who did not experience emotional abuse. While more survivors who suffered sexual abuse thought about suicide (among survivors who reported only one type of abuse), slightly more survivors who reported experiencing emotional abuse (24%) attempted suicide, than those who reported sexual abuse (21%), or physical abuse (11%). See Figure 12.

Figure 12. Percent Domestic Violence Survivors Who Reported Experiencing One Type of Child Abuse and Thinking About or Attempting Suicide, 2012

Similarly, more survivors who suffered a combination of abuses which included emotional abuse, thought about and attempted suicide than survivors of physical and sexual abuse. See **Figure 13**.

Domestic violence survivors with a parent with mental illness were six times (42%) more likely to have attempted suicide, than survivors with a parent without mental illness (7%).

D. Adult Domestic Violence Experiences

1. Prior Adult Domestic Violence Experience

Over half (57%, 628) of survivors reported having a prior domestic violence experience as an adult. Of these, three-quarters (72% or 455) were involved in a prior domestic violence experience with the same offender, 21% with a different offender, and 11% (68) with both the same offender and a different offender.

2. Prior In-Shelter Experience

Sixteen percent of survivors reported being in shelter before as an adult. Of these 179 victims in shelter before as an adult, 163 reported the number of times. Over one-third (39%) were in shelter two or more times.

Among race/ethnicities with a minimum of 20 survivors, “other” races comprised the race/ethnicity with the greatest proportion of survivors (40%) who reported being in shelter before as an adult, followed by Black survivors (25%), Native American survivors (22%), White (non-Hispanic) survivors (16%), and Hispanic survivors (14%). See **Figure 14**.

It requires further study with a greater number of survivors, but being in domestic violence shelter as a child may be a good predictor of being in domestic violence shelter as an adult. Those in this analysis who were in a domestic violence shelter as a child were four (3.9) times more likely than those not sheltered as a child, to be in a domestic violence shelter as an adult: of 16 victims in shelter as a child, 62.5% (10) were in shelter also as an adult; of 1085 victims not in shelter as a child, 16% (169) were in shelter as an adult. As stated, these findings on the relationship between being in shelter as a child and being in shelter as an adult should be viewed with caution as they are based on only 16 survivors in this analysis.

3. Survivor/Abuser Relationship

Current or former intimate partners were the abuser in 84% of the survivor domestic violence cases. *Current or former boyfriends* comprised the relationship with the greatest proportion of abusers (45%), followed by *current and former spouses* (33%). *Ex-girlfriends* and *girlfriends* comprised 6% of abusers, and *family members* comprised 9%.

Females (86%) were more likely to be abused by an intimate partner than males (70%). Males (20%) were significantly more likely to be abused by a family member than females (9%).

While an equal proportion of survivors lived with their abuser as did not live with their abuser (50%), significantly more female survivors (52%) than male survivors (37%) lived with their abuser.

When examined by income, those survivors who live with their abuser reported an annual median income of \$2400 less (\$9,600) than those who do not live with their abuser (\$12,000).

4. Domestic Violence Incidents Involving Survivor Substance Abuse

Twelve percent (137) of domestic violence survivors reported using alcohol/drugs during the domestic violence incident.

Survivors reported that abusers used alcohol/drugs in four times (53%) as many domestic violence incidents as incidents where survivors used alcohol/drugs (12%). Survivors who used alcohol/drugs during the domestic violence incident were two (1.8) times more likely (84%) than survivors who did not use alcohol/drugs (48%) to be involved in an incident where their abuser used alcohol/drugs.

Survivors reported that the abuser used alcohol/drugs significantly more in domestic violence incidents with female victims (54%), than male victims (45%).

Domestic violence survivors who were told they have a substance abuse problem, were five times (4.8) more likely to have used alcohol/drugs during the domestic violence incident (48%) than survivors without a substance abuse problem (10%).

Domestic violence survivors told they have a mental illness, were twice as likely to have used alcohol/drugs during the domestic violence incident (22%), than survivors without a mental illness (11%).

5. Type of Abuse/Violence Experienced from The Abuser

Survivors abused as children are six times more likely to experience abuse in an adult domestic violence incident, than survivors who were not abused as children: of 978 survivors who reported abuse in a recent or past domestic violence incident, 32% (316) reported experiencing child abuse; of 123 survivors who reported no abuse in a past or recent incident, 5% (6) reported experiencing child abuse.

In all, there were 978 (89%) survivors who reported recent or past abuse as an adult by an intimate partner.

There were 935 survivors (85%) who reported abuse from their offender in the most recent domestic violence incident. Of these, most (87%) reported verbal abuse, followed by physical attack (60%), being threatened to be harmed or killed (34%), and physical restraint (29%). One-quarter (27%) were either held hostage (14%) or prevented from calling for help (13%). A lethal weapon was used in 12% of cases, and strangulation was involved in 11% of cases. Similarly, 11% of survivors reported being sexually abused/coerced, as well.

There were 820 survivors who reported being abused by an intimate partner in the past. Similar to the proportion of victims who reported abuse in the most recent incident, most victims who experienced past abuse from an intimate partner were verbally assaulted/degraded (83%), physically attacked (62%), or threatened (33%). Seventeen percent of those abused by an intimate partner in the past were sexually coerced, 15% respectively, were held hostage and threatened with a lethal weapon, and 14% respectively, were strangled and prevented from calling for help.

Of the 820 survivors who reported abuse by an intimate partner in the past, 807 (98%) reported abuse in the most recent domestic violence incident. Overall, there were 978 victims who reported abuse in a past or recent incident. Of these, 136 (14%) reported they or a partner were pregnant during the abuse.

6. Injury

One-quarter (27%) of survivors reported being injured in a recent or past domestic violence incident. Females were almost three (2.6) times more likely (29%) than males (11%) to report being injured during a domestic violence incident.

Among races/ethnicities represented by at least 20 domestic violence survivors, Native Americans (56%) reported the most survivors who incurred injury from a domestic violence incident, followed by Black survivors (42%), survivors of "other" races (40%), White (non-Hispanic) survivors (26%), and Hispanic survivors (23%).

Survivors who ever experienced abuse from an intimate partner while they or their partner were pregnant, were two times (2.2) more likely to report having been injured in a domestic violence incident (52%), than survivors who reported they or their partner did not experience abuse while pregnant (24%).

Involvement in a domestic violence incident as an adult increases one's likelihood of injury in a subsequent domestic violence incident: three-quarters (77%) of those survivors who reported being injured in a domestic violence incident, reported being involved in a prior adult domestic violence experience.

Survivors who have been told they have a substance abuse problem, were almost two times (1.8) more likely to report being injured in a domestic violence incident (46%) than those who do not have a substance abuse problem (26%).

Survivors who have been told they have a mental illness, were almost two times (1.7) more likely to report being injured in a domestic violence incident (42%) than those who do not have a mental illness (25%).

7. Medical Treatment

Of the 302 survivors who were injured, 44% (132) required medical treatment.

Over all, the rate of seeking medical treatment among injured survivors who required it, was quite high. Of the 132 injured survivors who required medical treatment, 83% (110) sought treatment.

Slightly more (87%) survivors with a substance abuse problem who needed treatment, sought treatment. Similarly, slightly more (84%) survivors with a mental illness who required treatment, sought treatment.

As mentioned earlier, female survivors were three times (29%) more likely to report being injured during a domestic violence incident than male survivors (11%). Of 294 female victims who were injured in a domestic violence incident, 129 (44%) required medical treatment. Of the 129 female survivors who required medical treatment, 85% (109) sought medical treatment.

A valid analysis on the proportion of males who required treatment and sought it was not possible in this dataset: of 75 male survivors, eight reported being injured during a domestic violence incident and only one required treatment, but did not get it.

Among races/ethnicities represented by at least 20 domestic violence survivors, Black survivors and "other" races (50%, respectively) reported the most survivors who required medical treatment, followed by Native American and White (non-Hispanic) survivors (45%, respectively), and Hispanic survivors (41%).

Among races/ethnicities represented by at least 20 domestic violence survivors, all (100%, respectively) Black survivors and "other" race survivors who required medical treatment, sought medical treatment. However, the number of survivors from these racial groups is very few so these findings should be viewed with caution. Ninety percent of White (non-Hispanic) survivors who required medical treatment sought it, followed by 82% of Native American survivors, and 81% of Hispanic survivors.

8. Children present

Three-quarters (77% or 836) of survivors reported having children. When examined by gender, three-quarters (77%) of female survivors and 69% of male survivors have children.

Most survivors (29%) have two children. The mean number of children per survivor is 2.7. Male survivors had a slightly higher mean number of children (2.9) compared to females (2.7). Among races/ethnicities represented by 20 or more survivors, Native American survivors had the highest mean number of children (2.9), followed by Hispanic survivors (2.8), and White (non-Hispanic) survivors (2.5).

Of 841 survivors with children, 47% (398) reported that their children were present during the most recent domestic violence incident; and 40.5% (341) during a past domestic violence incident.

Survivors reported children present in a greater proportion of domestic violence incidents where the survivor lived with their abuser (53%), than incidents where survivors did not live with their abuser (41%).

There was a negligible difference in annual median income between survivors with children present during a domestic violence incident (\$12,000) and survivors where children were not present (\$10,872).

9. Children Abused

Of 841 children present at domestic violence incidents, 20% (167) were abused by the survivor's abuser. Most children were verbally abused/degraded (69%), physically attacked (32%), threatened that they or loved ones would be harmed or killed (20%), or physically restrained (17%). Seventeen percent of children were either held hostage (10%) or prevented from calling for help (7%). Eight percent of children were sexually abused, 6% threatened with a lethal weapon, 5% strangled, and 4% threatened that their pets would be harmed or killed.

10. Children Injured

Of 167 children present and abused in a domestic violence incident, 7% (12) were injured. Of 12 children injured, 3 (25%) required medical treatment. Of three children who required medical treatment, one obtained medical treatment.

11. Law Enforcement and Prosecution Involvement

Sixty percent of survivors reported a domestic violence incident to law enforcement. Slightly more (64%) male survivors reported a domestic violence incident to law enforcement than female survivors (60%).

Slightly more survivors with children (61%) than survivors without children (56%) reported their domestic violence incident to law enforcement. There was negligible difference in a survivor's likelihood of reporting to law enforcement by their number of children, as those survivors who reported to law enforcement had an average 2.7 children and those who did not report had an average 2.8 children.

When examined by race/ethnicity, among races/ethnicities with 20 or more survivors, there were negligible differences in the proportion who reported a domestic violence incident to law enforcement. Slightly more Black and Native American survivors (67%, respectively) reported their incident to law

enforcement, followed closely by survivors of “other” races (65%), White (non-Hispanic) survivors (61%) and Hispanic survivors (60%).

Of the 40% of survivors who never reported a domestic violence incident to law enforcement, only 38 reported the reason they never reported. The greatest number of survivors stated that they did not report because they were *scared* (19), followed by those who did not report because they *believed that nothing would get done* (6), and because they *wanted to work out the relationship* (5). See Table B.

Table B. Why Survivors Never Reported a Domestic Violence Incident to Law Enforcement

Reason	Total
Scared	19
It would get worse/he would get mad/scared of what husband will do	5
Scared for my life	2
He threatened to kill me, my family and take my child	1
Scared because I’m not a citizen	1
Scared	10
Family reasons	2
Wanted it to work out	5
Thought he would change	1
Thought I could handle it	1
Wanted it to work out	3
Didn’t think anything would get done	6
They would just tell me to get an order of protection	1
Didn’t think law enforcement would understand emotional abuse	1
Didn’t think it was bad enough for the cops to do anything	1
Never got physical before	1
Just verbal/mental abuse	1
Non-violent	1
Just wanted to get away	2
Didn’t want anyone else involved	1
Hiding own and perpetrators drug use from CYFD	1
Offender took my phone so I couldn’t call anyone	1
Mental illness (need professional help – not jail)	1

One-quarter (26%) of survivors reported that they had been stalked by the abuser in a recent or past domestic violence incident. Of these 285 stalking survivors, 21% (60) reported the stalking to law enforcement.

When stalking was examined by race/ethnicity, a greater proportion of Black survivors (58%) were stalked by their abuser, followed by survivors of “other” races (40%), Native American survivors (39%), Hispanic survivors (24%) and White (non-Hispanic) survivors (23%).

Half (49%) of domestic violence survivors obtained a protection order for the most recent domestic violence incident. Males (81%) were almost two times (1.8) more likely than females (46%) to obtain a protection order for the most recent domestic violence incident.

Of the 628 survivors involved in a prior domestic violence incident as an adult, 20% (125) obtained an order of protection. With regard to prior domestic violence events, more females (20%) than males (12%) reported obtaining a protection order.

Of the 628 survivors who had a prior domestic violence incident, 12% (77) pressed charges. More female survivors (13%) pressed charges for a prior domestic violence incident than male survivors (3%). The number of survivors who pressed charges was too few to do a valid analysis by gender, race, or income.

12. Case Dispositions and Sentencing

Of 77 survivors who pressed charges, the case dispositions were reported for 43. Of these cases, 58% obtained a conviction (51% prosecuted and found guilty, and 7% pled to a lesser charge), 30% of cases were dismissed, 5% of cases were acquitted, and in 7% of cases the offender was given a diversion program.

Of the 25 survivors who pressed charges and obtained a conviction, 23 (92%) received a sentence that included jail time. The case sentencing was reported in 14 of these cases. Over half (56%, 8) were sentenced to 3 months or less, 14% (2) were sentenced to 6 months, 21% (3) were sentenced 15-18 months, and 7% (1) to two years. The mean jail sentence was 7.2 months.

13. Leave/Stay History

Almost two-thirds (60% or 656) of survivors reported that they left a violent relationship at some time. Of these, one-third (32% or 212) reported that they returned.

Of 212 survivors who returned to their abuser, 101 reported why they returned. Most mentions for returning to their abuser include: *returned to try to work it out* (63), *returned for the children* (27), and returned *because they were scared* (15). See Table C.

Table C. Why Survivors Returned to a Violent Relationship They Left

Reason	Total
Tried to Work it Out	63
I thought he loved me	1
Hope he/she would change/said he would change/said he would get help	28
Felt sorry for him	3
He was going to counseling	4
Wanted it to work out	12
Love/I loved him	12
Thought things would get better	3
Returned for the Children	27
She was pregnant	1
Financially dependent on him	1
Children miss him	1
Returned for the children	24
Scared	15
Fear on my own/no support/lack of resources	7
Intimidated to return	1

Reason	Total
Said he would kill me/feared for my life	2
He found me/he took me forcefully	2
Scared	3
Family influence/pressure	1
He has complete control over me (financially, physically and mentally)	1
I was dumb/stupid	1
Don't know why I returned	2

When examined by survivor income, there was negligible difference in the annual median income of survivors who left a violent relationship at some time (\$11,000) and those who did not leave (\$10,872). Conversely, there was a greater difference in the median income of those who left and stayed away and those who left and returned: survivors who left a violent relationship and did not return had a median annual income \$2,080 greater (\$12,000) than those who left and returned (\$9,920).

Of the 628 survivors who were involved in a prior domestic violence experience, 43% (268) reported that they live with an offender with whom they have a prior domestic violence incident.

When examined by income, survivors who live with an offender with whom they have a prior domestic violence experience had a median annual income \$2400 less (\$9,600) than survivors who do not live with an offender with whom they have a prior domestic violence experience (\$12,000).

14. How Domestic Violence Survivors Hear About Service Providers

Of 969 survivors who reported how they heard about the domestic violence service provider agency, most (23%) were referred by law enforcement or were self/voluntary referred (20%). Twelve percent of survivors had used a service provider before, 9% were referred by a friend, 6% by a relative, and 5% by the adult court system. See Table D.

Table D. How Survivors Hear About Domestic Violence Service Providers

Source	Number of Survivors	Percent Survivors
A Lawyer	6	1%
Adult Court System	52	5%
CYFD Juvenile Justice Division	1	0%
CYFD Protective Services	30	3%
Doctor/family practitioner	9	1%
Employer	4	0%
Family member/Relative	57	6%
Friend	92	9%
Juvenile Court System	2	0%
Law Enforcement Agency	221	23%
Other	130	13%
Probation or Parole	4	0%
Public service announcement on TV	37	4%
School	2	0%
Self or voluntary referral	194	20%
Through an Order of Protection	3	0%
Tribal Government/Agency	12	1%
Used it before	113	12%
Total	969	100%

APPENDIX B. DEFINITIONS

Domestic violence incidence as determined by law enforcement include all incidents of assault, aggravated assault, battery, and aggravated battery as outlined in the “Crimes Against Household Members Act” as follows:

30-3-10. Short Title.

This act (30-3-10 to 30-3-18 NMSA 1978) may be cited as the “Crimes Against Household Members Act”.

30-3-11. Definitions

- A. As used in the Crimes Against Household Members Act (30-3-10 to 30-3-18 NMSA 1978), “household member” means spouse, former spouse, parent, present or former step-parent, present or former parent in-law, grandparent, grandparent-in-law, a co-parent of a child or a person with whom a person has had a continuing personal relationship. Cohabitation is not necessary to be deemed a household member for the purposes of the Crimes Against Household Members Act;
- B. “continuing personal relationship” means a dating or intimate relationship.

30-3-12. Assault against a household member.

- A. Assault against a household member consists of:
 - (1) an attempt to commit a battery against a household member; or
 - (2) any unlawful act, threat or menacing conduct that causes a household member to reasonably believe that he is in danger of receiving an immediate battery.
- B. Whoever commits assault against a household member is guilty of a petty misdemeanor.

30-3-13. Aggravated assault against a household member.

- A. Aggravated assault against a household member consists of:
 - (1) unlawfully assaulting or striking at a household member with a deadly weapon; or
 - (2) willfully and intentionally assaulting a household member with intent to commit any felony.
- B. Whoever commits aggravated assault against a household member is guilty of a fourth degree felony.

30-3-14. Assault against a household member with intent to commit a violent felony.

- A. Assault against a household member with intent to commit a violent felony consists of any person assaulting a household member with intent to kill or commit any murder, mayhem, criminal sexual penetration in the first, second or third degree, robbery, kidnapping, false imprisonment or burglary.
- B. Whoever commits assault against a household member with intent to commit a violent felony is guilty of a third degree felony.

30-3-15. Battery against a household member.

- A. Battery against a household member consists of the unlawful, intentional touching or application of force to the person of a household member, when done in a rude, insolent or angry manner.
- B. Whoever commits battery against a household member is guilty of a petty misdemeanor.
- C. Upon conviction pursuant to this section, an offender shall be required to participate in and complete a domestic violence offender treatment or intervention program approved by the children, youth and families department pursuant to rules promulgated by the department that define the criteria for such programs.
- D. Notwithstanding any provision to the contrary, if a sentence imposed pursuant to this section is suspended or deferred in whole or in part, the period of probation may extend beyond three hundred sixty-four days but may not exceed two years. If an offender violates a condition of probation, the court may impose any sentence that the court could originally have imposed and credit shall not be given for time served by the offender on probation; provided that the total period of incarceration shall not exceed three hundred sixty-four days and the combined period of incarceration and probation shall not exceed two years.

30-3-16. Aggravated battery against a household member.

- A. Aggravated battery against a household member consists of the unlawful touching or application of force to the person of a household member with intent to injure that person or another.
- B. Whoever commits aggravated battery against a household member by inflicting an injury to that person that is not likely to cause death or great bodily harm, but that does cause painful temporary disfigurement or temporary loss or impairment of the functions of any member or organ of the body, is guilty of a misdemeanor.
- C. Whoever commits aggravated battery against a household member by inflicting great bodily harm or doing so with a deadly weapon or doing so in any manner whereby great bodily harm or death can be inflicted, is guilty of a third degree felony.
- D. Upon conviction pursuant to Subsection B of this section, an offender shall be required to participate in and complete a domestic violence offender treatment or intervention program approved by the children, youth and families department pursuant to rules promulgated by the department that define the criteria for such programs.
- E. Notwithstanding any provision to the contrary, if a sentence imposed pursuant to the provisions of Subsection B of this section is suspended or deferred in whole or in part, the period of probation may extend beyond three hundred sixty-four days but may not exceed two years. If an offender violates a condition of probation, the court may impose any sentence that the court could originally have imposed and credit shall not be given for time served by the offender on probation; provided that the total period of incarceration shall not exceed three hundred sixty-four days and the combined period of incarceration and probation shall not exceed two years.

30-7-17. Multiple convictions of battery or aggravated battery.

- A. Whoever commits three offenses of battery against a household member as provided in Section 30-3-15 MNSA 1978 or aggravated battery against a household member as provided in Subsection B of Section 30-13-16 NMSA 1978, or any combination thereof, when the household member is a spouse, a former spouse, a co-parent of a child or a person with whom the offender has had a continuing personal relationship is guilty of a fourth degree felony.
- B. Whoever commits four or more offenses of battery against a household member as provided in Section 30-3-15 NMSA 1978 or aggravated battery against a household member as provided in Subsection B of Section 30-3-16 NMSA 1978, or any combination thereof, when the household member is a spouse, a former spouse, a co-parent of a child or a person with whom the offender has had a continuing personal relationship is guilty of a third degree felony.
- C. For the purpose of determining the number of offenses committed, each offense must have been committed after conviction for the preceding offense.

30-3-18. Criminal damage to property of household member; deprivation of property of household member.

- A. Criminal damage to the property of a household member consists of intentionally damaging real, personal, community or jointly owned property of a household member with the intent to intimidate, threaten, or harass that household member.
- B. Whoever commits criminal damage to the property of a household member is guilty of a misdemeanor, except that when the damage to the household member's interest in the property amounts to more than one thousand dollars (\$1000), the offender is guilty of a fourth degree felony.
- C. Deprivation of the property of a household member consists of intentionally depriving a household member of the use of separate, community or jointly owned personal property of the household member with the intent to intimidate or threaten that household member.
- D. Whoever commits deprivation of the property of a household member is guilty of a misdemeanor.

30-3A-2. Harassment

- A. Harassment consists of knowingly pursuing a pattern of conduct that is intended to annoy, seriously alarm or terrorize another person and that serves no lawful purpose. The conduct must be such that it would cause a reasonable person to suffer substantial emotional distress.
- B. Whoever commits harassment is guilty of a misdemeanor.

30-3A-3. Stalking

- A. Stalking consists of knowingly pursuing a pattern of conduct, without lawful authority, directed at a specific individual when the person intends that the pattern of

conduct would place the individual in reasonable apprehension of death, bodily harm, sexual assault, confinement or restraint of the individual or another individual.

B. As used in this section:

(1) “lawful authority” means within the scope of lawful employment or constitutionally protected activity; and

(2) “pattern of conduct” means two or more acts, on more than one occasion, in which the alleged stalker by any action, method, device or means, directly, indirectly or through third parties, follows, monitors, surveils, threatens or communicates to or about a person.

C. Whoever commits stalking is guilty of a misdemeanor. Upon a second or subsequent conviction, the offender is guilty of a fourth degree felony.

D. In addition to any punishment provided pursuant to the provisions of this section, the court shall order a person convicted of stalking to participate in and complete a program of professional counseling at the person's own expense or a domestic violence offender treatment or intervention program.

30-3A-3.1. Aggravated Stalking

A. Aggravated stalking consists of stalking perpetrated by a person:

(1) who knowingly violates a permanent or temporary order of protection issued by a court, except that mutual violations of such orders may constitute a defense to aggravated stalking;

(2) in violation of a court order setting conditions of release and bond;

(3) when the person is in possession of a deadly weapon; or

(4) when the victim is less than sixteen years of age.

B. Whoever commits aggravated stalking is guilty of a fourth degree felony. Upon a second or subsequent conviction, the offender is guilty of a third degree felony.

C. In addition to any punishment provided pursuant to the provisions of this section, the court shall order a person convicted of aggravated stalking to participate in and complete a program of professional counseling at his own expense.

30-4-3. False imprisonment

A. False imprisonment consists of intentionally confining or restraining another person without his consent and with knowledge that he has no lawful authority to do so.

B. Whoever commits false imprisonment is guilty of a fourth degree felony.

Appendix C. Participating Law Enforcement Agencies 2020

Police Department Name	Street Address	City	State	Zip Code
Acoma Tribal Police Department	P.O. Box 468	Acoma	NM	87034
Albuquerque Police Department	400 Roma NW	Albuquerque	NM	87102
Angel Fire Police Department	3465 Mountain View Blvd.	Angel Fire	NM	87710
Anthony Police Department	P.O. Box 2663	Anthony	NM	88021
Artesia Police Department	702 W. Chisum	Artesia	NM	88210
Bayard Police Department	P.O. Box 788	Bayard	NM	88023

Appendix D. Law Enforcement Domestic Violence Data Collection Form
Y20

1. Agency Name _____
2. Quarter Reporting 1st 2nd 3rd 4th Year: 2020
3. ____ Number of **Harassment** Incidents (30-3A-3.2)
- 3a. ____ Number of **Stalking** Incidents 3b. ____ Number of Stalking Incidents resulting in a homicide
4. ____ Number of **Domestic Violence** (DV) Incidents for the quarter (Based on offense incident reports)
- 4a. ____ Number of Domestic Violence Incidents resulting in a homicide
- 4b. ____ Total number of DV homicide victims (____ #female homicide victims ____ # male homicide victims)
5. ____ Number of male DV victims ____ Number of female DV victims ____ Number DV victims gender unknown
6. Number of DV victims per age group Number of DV suspects per age group

____ 0-6	____ 0-6
____ 7-12	____ 7-12
____ 13-18	____ 13-18
____ 19-25	____ 19-25
____ 26-35	____ 26-35
____ 36-45	____ 36-45
____ 46-55	____ 46-55
____ 56-65	____ 56-65
____ 66+ ____ # victims age unknown	____ 66+ ____ # suspects age unknown
7. Number of DV victims per each race/ethnicity Number of DV suspects per each race/ethnicity

____ Caucasian	____ Caucasian
____ Hispanic	____ Hispanic
____ Native American	____ Native American
____ Asian/Pacific Islander	____ Asian/Pacific Islander
____ Black	____ Black
____ Other ____ # victim race/ethnicity unknown	____ Other ____ # suspect race/ethnicity unknown
8. ____ Number of DV male suspects ____ Number of DV female suspects ____ Number DV gender unknown
- 9a. ____ Number of domestic violence incidents involving injury
- 9b. Of **9a** incidents, how many involved: victim injury ____ suspect injury ____ police officer injury ____
10. Number of DV incidents with each type of injury: ____ B (apparent broken bone) ____ I (possible internal injury)

7. Number for each Survivor/Offender Relationship category as reported by adult victims:

Dating Living Together Married Family Member
 Separated Divorced Ex-partner Other Unknown

8. Number for each Length of Relationship category as reported by adult victims:

0 months - 11 mos. 1 year - 2 yrs. 3 - 5 yrs.
 6 - 10 yrs. 11 - 20 yrs. 21+ years Unknown

9. Number of New Clients Who Were Abused or Witnessed Abuse as a Child:

<u>Adult Victims (as reported by adult victims):</u>	<u>Offenders (as reported by adult victims):</u>
Number Yes <input type="checkbox"/> Number No <input type="checkbox"/> Unknown <input type="checkbox"/>	Number Yes <input type="checkbox"/> Number No <input type="checkbox"/> Unknown <input type="checkbox"/>

Offenders (as reported by offenders in treatment):
 Number Yes Number No Unknown

10. Use of Alcohol/Drugs At The Time of the Domestic Violence Incident:

<u>Adult Victims (as reported by adult victims):</u>	<u>Offenders (as reported by adult victims):</u>
Number Yes <input type="checkbox"/> Number No <input type="checkbox"/> Unknown <input type="checkbox"/>	Number Yes <input type="checkbox"/> Number No <input type="checkbox"/> Unknown <input type="checkbox"/>

Offenders (as reported by offenders in treatment):
 Number Yes Number No Unknown

11. Number of adult victims/survivors who reported their incident to law enforcement _____.
12. Number of adult victims/survivors who reported that children were present at the time of the presenting incident _____.
13. Number of adult victims/survivors who reported that a weapon was involved in the presenting incident _____.
14. Number of incidents resulting in a criminal complaint as reported by adult victims _____.
15. Number of incidents resulting in the filing of a protective order as reported by adult victims _____.
16. Number of adult victims/survivors who experienced domestic violence in the past _____.
17. Number of adult victims/survivors who experienced a physical injury as a result of the presenting incident _____.
18. Number of adult victims/survivors who experienced forced or coerced sexual activity from current offender _____.
19. Number of children/victim witnesses who ever experienced physical abuse from current offender _____.
20. Number of children/victim witnesses who ever experienced sexual abuse from current offender _____.
21. Number of immigrant victims/survivors: _____ adults _____ children
22. Number of adult/survivors with a mental or physical disability _____

Submit completed forms for each quarter as follows:

- 1st quarter (January through March) by April 15th
- 2nd quarter (April through June) by July 15th
- 3rd quarter (July through September) by October 15th
- 4th quarter (October through December) by January 15th
